

## **Journal of Risk Research Partnership**

The seminar team are pleased to announce that the series has been awarded with a special edition in the *Journal of Risk Research* in the winter of 2015, highlighting the importance of both the seminar series and the topics under discussion to the wider academic community. The main aims of the Journal of Risk Research are to stimulate intellectual debate, to promote better risk management practices and to contribute to the development of risk management methodologies. The team therefore could think of no better home for a special edition dedicated to the topics within the seminar series.

The special edition is interested in papers that address ‘people risk’ with cross-disciplinary (academic or industry) applications or outcomes.

Papers submitted for this special issue will undergo the normal journal reviewing process.
