

## STATISTICS ON ACCEPTANCE RATES:

Just over 400 papers were submitted. Space and timing constraints meant that just over 180 could be accepted for the Conference

34 reviewers were used this year. Reviewers are appointed by the Programme Committee for a three or four year duration. They are asked to grade papers on a 1 to 5 scale, from 'definitely accept' to 'definitely reject'. All 'definitely accept' (n=115) were included in the programme, as were the vast majority of the next category. All other papers had to be rejected.
