Selective release

WebCT allows you to selectively release items (links, folders, assessments) in Course Content by date, users, and user groups. To set up selective release:

- Click on the **Teach** tab
- Click **Selective Release** under Instructor Tools
- Choose one or more items in Course Content to apply selective release to. Use the + icon by folders to expand them if necessary.
- Click **Set Release Criteria**
  - o For timed release, click on **Add Date Criteria** - this allows you to set a release date and time, and to specify how long an item will be displayed to students.
  - o To restrict items to/from individual users, click on **Add Member Criteria**, tick the users you want, select **Equals** or **Does not equal**
  - o To restrict items to/from one or more user groups , click on **Add Group Criteria**
- Click **Save** to dismiss the popup window
- Click **Save** in the main window

NB: selective release is *not* available in Build mode.

Usage

Selective release is frequently used to display a limited part of a course to enrolled students before a course begins, or to set up time-limited summative and formative assessments.
