Systematic Review Training: Short Courses

The University of Nottingham Centre for Evidence Based Healthcare was established in 2003 as the first European based Centre of the Joanna Briggs Institute (JBI) - a globally renowned international organisation whose mission is to promote the science and practice of Evidence Based Healthcare.

Our vibrant and growing Centre focuses on evidence synthesis and is made up of experienced health researchers, information scientists and clinical practitioners. We publish several systematic reviews each year, registered through the JBI or Cochrane Collaborations. Our Centre works very closely with clinical partners to ensure that our work addresses important clinical questions and directly informs practice. Centre staff have many years' experience of providing systematic review training in local, national and international contexts.

Systematic Review Training: Short Courses

Our courses

The Centre runs systematic review courses of varying length, depending on individual training requirements. Each course is made up of different modules, as follows:

Module	Title
Module 1	Introduction to Evidence Based Healthcare and Topic Protocol Development
Module 2	Systematic Review of Evidence Generated by Quantitative Research (meta-analysis)
Module 3	Systematic Review of Evidence Generated through Qualitative Research, Narrative and Text (meta-synthesis)

Our courses attract national and international participants and are delivered by experienced members of the Centre, all of whom are JBI-accredited trainers. Participants receive a certificate of completion from JBI and copies of all resources used during the training.

Courses dates 2015

Dates	Course Title	Course Content
4 July-8 July 2016 (5 days)	Comprehensive systematic review training programme	Modules 1, 2 and 3
7-9 September 2016 (3 days)	Systematic reviews of quantitative evidence	Modules 1 and 2
12-14 September 2016 (3 days)	Systematic reviews of qualitative evidence	Modules 1 and 3

The five day course is aimed at individuals who wish to gain a comprehensive understanding of all aspects of systematic review. The shorter three day courses are aimed at individuals who wish to have more specialised training. Modules can also be taken flexibly across the range of dates, however Module 1 is compulsory. Completion of all three modules is essential for individuals who wish to undertake JBI's 'Training of Trainers' Programme.

What will you learn?

The training will enable you to develop the knowledge and skills required to undertake a rigorous systematic review of a topic relevant to your practice, using an appropriate methodology. Learning outcomes include:

- Understanding the role of systematic reviews in improving healthcare practice
- Understanding the different approaches to systematic review based on qualitative and/or quantitative evidence
- Identifying a relevant research question and developing a protocol for a systematic review
- Gaining skills in using the JBI software to facilitate the systematic review process

The training is delivered in a stimulating and interactive manner, using a combination of lectures, demonstrations, group work and computer-based exercises.

After the course

Centre staff will provide continued mentorship to individuals who wish to pursue a systematic review through the JBI Collaboration. If three Faculty members from the same institution complete all three modules, Nottingham Centre staff can support their institution to apply to become a JBI-Affiliate Centre.

Course fees

5 day course (3 modules) - £950

3 day course (2 modules) - £550

The course fee is inclusive of training materials. Accommodation can be arranged but is charged separately.

Cancellation policy

In the event of withdrawing your application for the course, the following administration charges will apply:

- Withdrawal within 1 month of the course start date – 75% of fees refunded
- Withdrawal within 2 weeks of the course start date – 50% of fees refunded
- Withdrawal within 1 week of the course start date – 0% of fees refunded
- Any amendments to the participant details and/or start date - £30 Administration charge
