95%

of final target

FINAL PUSH for THE FINISH LINE:

Recruitment is going well - we only need another 31 participants before recruitment ends at the end of February.

We've trained an extra three Occupational Therapists and managed to open two sites that weren't able to recruit because of the OT shortage.

PLEASE KEEP SENDING BACK YOUR QUESTIONNAIRES:

Without this information we won't be able to tell if the return to work support we are testing, makes a difference to:

- Whether people return to work or not after a stroke
- Their quality of life, wellbeing and finances

It will also be difficult to convince the NHS to invest in help for people to get back to work after a stroke.

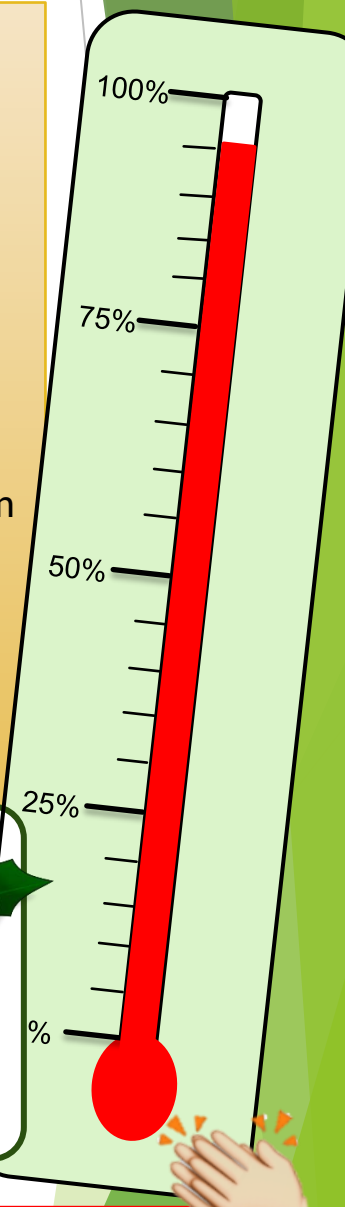

Need help filling them in?

please contact:- Andrew Carter, Trial Coordinator.
