OPENS SUMMER 2016
A place to innovate

The new Technology Entrepreneurship Centre (TEC) at The University of Nottingham Innovation Park has been designed to enable technology-focused entrepreneurs to fulfill their potential by linking with University expertise.

With an iconic 2000m² tyre shaped building, to reflect the site’s Raleigh Bicycles heritage, the TEC provides a unique space to develop and grow your business.

Grow your business
Businesses based at the TEC centre will receive intensive incubation support, including:
- A one-to-one business planning and commercialisation service.
- Access to expertise and facilities in the specialist research and technology centres.
- Specialist support and access to fully finance from Innovate Lab at Haydn Green Institute.
- Walk-in open access to the University Library, with access to specialist research.
- Contacts and networking opportunities with mentors, peers and potential investors.
- Advice on how best to access national programmes for innovation and growth.

On-site services and facilities
TEC businesses will have access to the University’s cutting-edge research centres:
The Aerospace Technology Centre – research and knowledge transfer centre.
The GSK Centre for Sustainable Chemistry – a centre of excellence in pharmaceuticals.
The Energy Technologies Building – with novel research facilities, including smart grid and green hydrogen refuelling facility.
Horizon Centre for Digital Economy Research – a leading international centre.
Advanced Manufacturing Centre – research at the forefront of manufacturing science.
Nottingham Geospatial Institute – satellite, positioning systems and data modelling.

Be a part of the TEC community
If you have a technology business or are looking to establish one, then the Technology Entrepreneurship Centre could be the perfect location for you. With a focus on sectors including Digital and Data, Advanced Manufacturing, Aerospace and Energy, the TEC will become a thriving community of high-tech entrepreneurs, creating the success stories of the future.
