

**Alan Irwin** is a Professor in the Department of Organization at Copenhagen Business School (CBS). From 2007-14, he was Dean of Research at CBS. He was also Acting President during 2011. Previously, he was Professor of Science and Technology Policy, and Dean of Social and Environmental Studies, at the University of Liverpool. His PhD is from the University of Manchester and he has held previous appointments at Manchester and at Brunel University. Currently, he is a member of the Strategy Advisory Board for the UK Global Food Security Programme. He is a Fellow of the Academy of Social Sciences, a foreign member of the Royal Danish Academy of Sciences and Letters, and an Honorary Fellow of the British Association for the Advancement of Science.

Alan Irwin has published over a number of years on issues of science and technology policy, scientific governance, environmental sociology and science-public relations. His books include: *Risk and the Control of Technology* (1985), *Citizen Science* (1995), *Sociology and the Environment* (2001) and (with Mike Michael) *Science, Social Theory and Public Knowledge* (2003). He was also co-editor (with Brian Wynne) of *Misunderstanding Science?* (1996). In 2009 Alan Irwin was awarded the David Edge prize for best paper in science and technology studies.
