James Wilsdon is Professor of Science and Democracy at SPRU (Science & Technology Policy Research), University of Sussex. He is also an Associate Fellow at NESTA and at the Cambridge Centre for Science and Policy. In September 2013, he became Chair of the Campaign for Social Science, which was set up in 2011 to raise the profile of UK social science and demonstrate its value to the public, policymakers and the media. His research interests include the role of evidence and expertise in policymaking; the politics of scientific advice; public engagement in research; and science and innovation policy in the UK, China and other emerging economies. From 2008 to 2011, he was the founding Director of the Science Policy Centre at the Royal Society. Prior to this, he was Head of Science and Innovation (2004-2008) and Head of Strategy (2001-2004) at the think tank Demos, and Senior Policy Adviser (1997-2001) at the sustainability NGO Forum for the Future. His publications include China’s Absorptive State: research, innovation and the prospects for China-UK collaboration (Nesta, 2013); Future Directions for Scientific Advice in Whitehall (CSaP/Alliance for Useful Evidence, 2013); The Scientific Century (Royal Society, 2010), New frontiers in science diplomacy (Royal Society, 2010). He is also part of the blogging team on the Guardian’s 'Political Science' blog, and you can find him on twitter @jameswilsdon
