Policy on support for pregnant students and students with very young children

Implementation Guidance for Staff and Students
This flowchart summarises the steps that could most usefully be taken when a student or applicant discloses a pregnancy – Section 4 of this document contains more information about each stage.

**Step 1**
Student consults her GP and other appropriate services and to consider disclosing her pregnancy to her School/Department, particularly where elements of her programme of study present risk to the health and safety of the student or child.

**Step 2 a Taught Students**
Student requests a meeting with her personal tutor, or other trusted member of staff, to discuss the implications of her pregnancy for her course of study. Consultation with financial support

**Step 2 b Research Students**
Student requests a meeting with her supervisor and/or her postgraduate research supervisor to discuss the implications of her pregnancy for her course of study

**Step 3**
The member of staff considers the implications of the pregnancy for the course of study – and ensures that any appropriate risk assessment(s) are completed for any potentially hazardous elements of the programme of study

**Step 4**
Student explores any potential implications of agreed flexibilities on payment of tuition fees with Tuition Fees and Student Administration

**Step 5**
School/Faculty prepares a written statement detailing agreed flexibilities and sends a copy to the student

**Step 6**
Responsible member of staff communicates written agreement to personal tutor and other relevant Extenuating Circumstances Board if appropriate

**Step 7**
Student and member of staff jointly monitor agreement through pregnancy and agree further adjustments if the need arises. Consult with financial support re any funding implications

5. What advice is available on Study Abroad and Work Placements? .............................................11

6. What support is available to staff members to help them to advise, or take a flexible approach to, a pregnant student? ........................................................................................................11

7. What support is available for a student whose partner is pregnant? ...........................................12

8. What support and facilities are available for a student who has recently become a parent? ....12

9. Where can I find further information? ........................................................................................14
Summary of key responsibilities

The University will ensure that:

- Any student who becomes pregnant before or during a period of study at the University is accommodated as far as practicable to allow her to complete her programme of study, providing academic standards are upheld
- Relevant staff are made aware of the terms of this policy and their responsibilities arising under it
- Support and guidance is available for staff undertaking risk assessments on elements of the programme of study that are likely to result in a risk to the health and safety of the student or unborn child [www.nottingham.ac.uk/safety/guides.htm#Pregnancy](http://www.nottingham.ac.uk/safety/guides.htm#Pregnancy) where appropriate a student can be referred to Occupational Health for guidance.
- Staff in Academic, Student and Financial Support Services and the Graduate School are available to discuss with staff the best way to support the continuing study of a pregnant student to ensure she is able to complete her programme of study
- Appropriate support is available to students through various support services (see page 14 for links)
- The policy is kept under review and updated as necessary

Schools and faculties must ensure that:

- The policy is widely publicised and available to staff and students
- Female students are made aware of the policy and encouraged to disclose a pregnancy in confidence at an early stage, particularly where elements of their programme of study might result in a risk to the health and safety of the student or unborn child [www.nottingham.ac.uk/safety/guides.htm#Pregnancy](http://www.nottingham.ac.uk/safety/guides.htm#Pregnancy)
- Staff are aware of the policy so that they can respond appropriately when a student discloses her pregnancy and seeks support to continue her programme of study
- As soon as a student discloses that she is pregnant, a risk assessment, or series of risk assessments, are undertaken to ensure that there are no elements of the programme of study that present a risk to the health and safety of the student or the unborn child (see Section 2)
- Wherever practicable, accommodation is made to ensure that a pregnant student, or student with a very young child, is able to complete her programme of study
- If requested, a female member of staff is identified with whom a pregnant student can discuss her support needs
- The student is given information on other sources of advice/support (see Section 10)

Individual staff members

All individual staff members are advised to:

- Familiarise themselves with this document and the University’s responsibilities towards students who are pregnant or have very young children

Individual staff members to whom a pregnancy is disclosed are responsible for:

- Reading the Policy and this document and, in particular, becoming familiar with the procedure for supporting pregnant students
- Treating any disclosure of a pregnancy seriously and making students aware of appropriate sources of support

---

Reference to very young children relates to children under the age of 6 months and, with particular regard to health and safety considerations, those beyond 6 month who are still being breastfed
Respecting a student’s right to confidentiality and verifying that a student has no objections to their pregnancy being discussed with others – particularly when information needs to be passed on to other staff members to arrange any agreed accommodations to the programme of study or adjustments to fees.

Ensuring accurate information is given to prospective students regarding the availability of support for students who are pregnant or have very young children.

Seeking advice from colleagues or central support services within the University if they are unsure of how best to support the continued study of a pregnant student (see Section 7).

Students (and applicants)

Students and applicants covered by this policy are responsible for:

- Disclosing their pregnancy to a trusted member of staff within their Department, School or Faculty at an early stage of their pregnancy, with a view to discussing any necessary support arrangements or adjustments – particularly where elements of their programme of study might present a health and safety hazard to the student or unborn child (see Section 2).

- Ensuring the safe supervision of any child they may bring onto campus: [http://www.nottingham.ac.uk/safety/child.htm](http://www.nottingham.ac.uk/safety/child.htm)

Students and applicants covered by this policy are advised to:

- Read the policy and associated guidance notes in order to understand the University’s approach to supporting pregnant students and students with very young children.

- Ensure that they have a clear idea of what will be expected of them on their course of study in order to understand the potential impact of pregnancy related absence.

- Discuss any concerns they have relating to their pregnancy with the University of Nottingham Health Centres or their own GP and, if required, staff in one or more of the following services: the Student Advice and Representation Centre, University Counselling Service, Safety Office, Accommodation Services and the Chaplaincy (see Section 10 for contact details).
1. Introduction and key guiding principles

This document provides students and staff – particularly personal tutors, admissions tutors, academic tutors, postgraduate research supervisors and all other staff who have a role in advising or supporting students or prospective students – with information about the University’s approach to supporting a student who is pregnant or has decided to terminate a pregnancy. It also provides some information relating to supporting a student (whether female or male) who has recently become a parent or is the partner of someone who has a very young child.

The University of Nottingham believes that being or becoming pregnant, terminating a pregnancy or having a very young child should not, in itself, be a barrier to applying for, starting, succeeding in, or completing a programme of study at the University of Nottingham. The University is committed to being as flexible as possible, providing academic standards are upheld. The special arrangements which can and should be made for a student in these circumstances will vary from faculty to faculty, school to school and, indeed, from programme to programme. However, the general approach to be taken in these circumstances is consistent across the University – as is the legal framework in which the University operates.

The policy and associated guidance notes are based on a set of important guiding principles, namely:

- **Avoiding less favourable treatment.** The University and its staff should avoid treating a student (or applicant) less favourably than other students or applicants on the grounds that she is pregnant or has terminated a pregnancy. Whilst particular arrangements may need to be made for an individual student (for example, a student should not return to University for two weeks after giving birth for health and safety reasons – see below), the University will seek to make sure that such arrangements do not place the student at a particular disadvantage compared to other students.

- **Taking a flexible approach.** The University recognises its obligations under the Sex Discrimination Act 1975 and the Equality Act 2010 and its staff will take a flexible approach to facilitating the continued learning of – and maintaining a high-quality and safe student experience for – a pregnant student, a student who is the parent of a very young child or a student whose partner is in either of these positions. (See Section 5 below for guidance on determining an appropriate degree of flexibility.)

- **Demonstrating a non-judgmental and sensitive approach.** When supporting and working with a student on these matters, staff should take an open-minded and non-judgmental approach. Information provided by the student should be treated sensitively and only passed onto others on a need-to-know basis (for example, in order to organise appropriate accommodations for the student relating to learning and teaching, assessment, placements, fees etc.).

- **Enabling informed choices.** Members of staff should not attempt to direct or unduly influence a student’s decisions. Their role is to provide context and advice to the student, and to explore, in consultation with the student and others, flexibility that can be applied to the student’s programme or period of study to provide appropriate support.

---

2 The Sex Discrimination Act 1975 prohibits organisations, including the University, from treating a person (including a student, staff member or visitor) less favourably than others on the grounds of sex. Discrimination on the grounds that a student is pregnant can constitute unlawful sex discrimination. The University is also placed, by the Equality Act 2006 and 2010, under a statutory duty to promote equality between women and men and to not discriminate on grounds of any protected characteristic. These guidelines have been drafted with these legal obligations in mind.
2. Does a student need to notify her School/Faculty\(^3\) of her pregnancy?

*Please note that it is particularly important to inform the School/Faculty at an early stage of a pregnancy where there is a potential risk to the health and safety of the student and/or her child (see below).*

Students are not under any obligation to inform their School/Faculty if they become pregnant, have a child, or decide to terminate a pregnancy whilst they are a student here. However, it is important to note that a School/Faculty will not be able to take a flexible approach to her programme of study, or provide specific support to the student, unless it knows about the situation. If requested, the School/Faculty will identify a female member of staff to discuss such support needs.

Whilst making a decision on whether or not to inform their School/Faculty, students are encouraged to consider the following:

- There may be elements of a programme of study that could present a health and safety risk to a pregnant student and/or her child\(^4\). A student’s School/Faculty will not be able to arrange appropriate risk assessments unless it is aware of her pregnancy.
- If a student’s pregnancy-related absence (for example, for antenatal appointments) impacts significantly on the student’s studies, the School/Faculty will only be able to take proper account of the reasons for absence if they are notified of these\(^5\).
- In some cases, a student’s pregnancy-related absence from University might be something that needs to be discussed with other organisations. For example, if a postgraduate research student is in receipt of a University or Departmental Scholarship or funding from a Research Council or other external body, she should refer to the terms and conditions relating to her award. The Student will generally be required to notify her supervisor and in some cases a relevant Suspension of Study or Extenuating Circumstances form will have to be completed, supported by a MATB1 certificate or doctor’s letter. This could make it more important for the student to notify the School/Faculty of the situation.
- Sometimes, the absence of a student from University can adversely affect the work of other students s/he is working alongside (for example, on a group project or in a research team), which might make it more important to notify the School/Faculty, so that plans can be made to deal with any such issues arising from the absence.

Various sources of advice and support are available to students, whether or not they decide to notify their School/Faculty of their circumstances (see Section 10 for more information).

**Note for International Students:** If an international student requires a Visa to remain in the UK during her period of study and her pregnancy is likely to result in the need to remain in the UK longer than planned, or if an international student is considering temporary suspension from her course of study, then immigration advice should be sought from the International Student Office ([http://www.nottingham.ac.uk/InternationalOffice/index.aspx](http://www.nottingham.ac.uk/InternationalOffice/index.aspx)).

---

\(^3\) In most cases, the most appropriate place to report, and receive support for, pregnancy related needs will be the student’s School. In others it may be the Faculty.

\(^4\) It is important to point out that, in the case of students with a potential exposure to hazardous radiation or chemicals, the greatest risk to the health of an embryo or foetus arises within the first 13 weeks of pregnancy. Students in these circumstances are strongly advised to inform their School of their pregnancy in order to allow a risk assessment to be undertaken. Further guidance on such risks can be found at: [http://www.nottingham.ac.uk/safety/guides.htm#Pregnancy](http://www.nottingham.ac.uk/safety/guides.htm#Pregnancy)

\(^5\) In the case of pre-arranged antenatal appointments, the School/Faculty would normally need to be notified of these in advance in order to take these into account.
3. What process should be followed for a student and her School/Faculty to discuss the impact that the student’s pregnancy or childcare responsibilities may have on her studies?

This section outlines a series of steps for students and staff to follow in order to discuss and respond to the requirements of an individual student who is pregnant. **This section should be read in conjunction with the flowchart presented at the beginning of this document.**

**Step 1:** A student is strongly advised to consult the University Health Centre or her GP to discuss medical issues relating to her pregnancy prior to approaching her School. *It is particularly important to take advice at an early stage if there is any possible health and safety risk.*

Since the focus of this 7-step process is on considering the implications of pregnancy on the student’s programme of study and academic work, students are also reminded that they can, at any stage, contact other sources of non-academic advice and support (including the University Counselling Centre, the SU Student Advice and Representation Centre, the Chaplaincy, the Safety Office, etc. – see Section 10 for contact details).

**Step 2a: Taught Students**

A pregnant student has the right to request a meeting with her personal tutor or other trusted staff member. (Some Schools may choose to identify another member of pastoral support staff for students to contact to discuss these issues. Any School taking this route must publicise the appropriate point of contact to all students – e.g. on its website and in School handbooks.) If so requested, the School will identify a female member of staff to discuss the implications for the continuation of her study.

The student and the relevant staff member must meet to discuss and agree a plan for her continuation of study. Whenever possible, the member of staff should contact the student within 5 working days of the request being received from the student and meet her as soon as possible thereafter. **It will also be important for the student to consult with financial support re any student loan or award implications**

At the meeting, it is essential that urgent consideration is given to undertaking a risk assessment (see Step 3 below). In addition, careful consideration must be given to the variety of ways in which the student can be enabled to continue her studies during her pregnancy or after the birth. For example, these might include:

- agreeing periods of absence and making arrangements for the student to catch-up on lectures/tutorials missed for pregnancy/birth related reasons to ensure that she is not at an academic disadvantage
- adjusting timescales/deadlines for assessed coursework deadlines if the pregnancy or birth prevents compliance
- Seeking approval, as appropriate, from the School for alternative means of assessment for the student (for example, a written assessment instead of a physical performance if possible) if the pregnancy or birth prevents the normal methods of assessment
- allowing the student first attempt re-sits at future examination periods, for example in a situation in which the pregnancy or birth prevents the student from taking an examination at the normal time for her programme of study
- the student taking some time out from her studies which would involve the student completing a voluntary suspension form normally for a pre-determined amount of time. The period of temporary suspension may be extended if the time required to complete the programme of study will still fall within the maximum time limit allowed for the programme either by the University (and/or, where applicable, professional bodies). Where necessary a student can be referred to Occupational Health for guidance.

consideration of a transfer to part-time study (information on the financial support available to part-time students is available from the Financial Support Team in Student Services www.nottingham.ac.uk/studentservices/financialsupport/index.aspx tel +44(0)115 82 32071 e-mail financialsupport@nottingham.ac.uk

As well as covering the student’s longer-term plans relating to her studies, the continuation of study plan should also:
- accommodate the student’s antenatal care,
- include a break from attending University of at least two weeks after giving birth for health and safety reasons, and
- include provision for re-integrating the student to the programme of study on return from any prolonged absence.

The staff member overseeing the support arrangements should refer to the guidance below when considering what flexibility might be appropriate in any given situation.

### Step 2b: Postgraduate Research Degree Students

In the case of a research degree candidate who becomes pregnant, the appropriate individual to contact will normally be her supervisor(s) and/or the postgraduate student adviser within the School. The postgraduate supervisor(s) and research tutor will work together with the student to consider the impact of the pregnancy and any resulting suspension of study. This will include a risk assessment as described in step 3 below.

The Student requests suspension of study under the Voluntary Suspension policy using the form available at: (http://www.nottingham.ac.uk/academicservices/qualitymanual/studyregulations/voluntarysuspensionofregistration.aspx). The form is counter-signed by her Supervisor and Head of School and returned to Student Administration together with supporting evidence e.g. MAT1B – such a request should not be retrospective.

If the student has already suspended her programme of study for a period of 12 months (full-time) or 24 months (part-time) or more, approval will be sought from the University’s Quality and Standards Committee as required by the Policy. The student is responsible for checking the implications of a suspension of study with her scholarship awarding body or provider (if applicable) at an early stage. For students funded by a Research Council, or on a University Research Scholarship, advice is available from the Graduate School.

### Step 3: The member of staff overseeing the support arrangements for the student (e.g. the personal tutor, research supervisor or other designated person) should ensure that
appropriate steps are taken in relation to health and safety issues. In most cases, this will involve a risk assessment for the individual student.

Advice can be sought from the School Safety Officer and/or the University Safety Office.

For some students – for example, those participating in field trips, studying a laboratory-based subject, working with equipment which poses a danger to the health of a pregnant woman or foetus (e.g. equipment producing radiation) or taking a programme of study which involves high levels of physical activity – it will be even more important that the health and safety implications of pregnancy are given serious consideration. In these situations, staff should seek advice as soon as possible from the School/Faculty Officer and/or University Safety Office and a full risk assessment should be completed. (Whilst it is aimed at responding to the needs of pregnant employees rather than pregnant students, provides some helpful information on relevant health and safety issues.)

If it is not practicable to alter the study conditions to respond to the risk(s) highlighted by this assessment, or if such an alteration would not avoid any identified risk(s), the student may need to take time out from her study to ensure she avoids them – although a concerted effort should be made by the School/Faculty to manage the health and safety risks and find alternative ways of allowing a student to continue her course in any situation where a temporary suspension is not in line with her wishes.

Step 4: The student should explore with the Tuition Fees section of Student Services any potential impact that the flexibility proposed may have in terms of payment of her tuition fees or registration.

As with Step 1 students are also reminded that they can, at any stage, contact other sources of non-academic advice and support (including the University Counselling Centre, the SU Student Advice and Representation Centre, the Chaplaincy, the Safety Office, etc. – see Section 10 for contact details).

Please note that, if the student is in receipt of a bursary or scholarship, she must also discuss the implications of any absence with the funding body.

Step 5: Once discussed and agreed, a written plan for the student’s continuation of study (detailing any specific flexibility agreed to allow the student to continue her studies) should be sent by the School/Faculty to the student. Where possible, written agreement to this plan should be sought from the student. Student Services can be contacted for further advice if necessary.

Where a student is dissatisfied with the degree of flexibility offered, she may ask her School/Faculty for information about the local complaints procedures or make a formal complaint, if appropriate – in line with the Student Complaints Procedure. If there is doubt staff can contact any of the advisory services within either Student Services or Academic Services for advice and guidance.
Step 6: The member of staff overseeing the support arrangements should communicate the agreed continuation plan to the Personal Tutor/Research Supervisor and other relevant teaching staff and/or examination boards, as appropriate. Information should be passed on sensitively.

Step 7: The student and her personal tutor/supervisor (or other chosen/designated staff member) should monitor the situation on an ongoing basis, particularly to assess the effectiveness of any special arrangements that have been agreed to facilitate the student’s continued study.

The student can request further meetings with her School/Faculty, particularly if she is experiencing any difficulties with her academic work as a result of these arrangements. The student should also consult with financial support re any student loan or award implications of suspending a course.

4. How should a School determine an appropriate degree of flexibility?

It is not possible to provide a definitive list of special arrangements that might be considered reasonable in every possible situation because the decisions about which arrangements are appropriate in each particular case will vary according to a wide range of factors. These factors include the student’s individual circumstances, the time of year, the structure and content of the particular programme of study, restrictions imposed by professional bodies and any related health and safety matters.

Staff members are advised to take into account the following when considering what might be appropriate in a given case:

- A student’s own views on her options are very important and it is vital that staff consult her openly on the way forward, rather than seeking to implement a predetermined set of adjustments.
- At the same time, it is important to note that Schools/Faculties do not have to agree to any or all requests made by the student. There may be some situations in which it is impossible or unreasonable for a School/Faculty to agree to a particular request.
- To ensure best practice, and avoid any inadvertent discrimination, a School/Faculty should not normally decline a request from a pregnant student for particular special arrangements solely on grounds that they are too costly to implement (although this may be one factor taken into account when deciding on the overall reasonableness of meeting the request).
- If a School/Faculty decides to decline a flexibility request from a pregnant student, it is considered good practice for the School/Faculty to document its reasons for refusing the request and discuss with the student why this particular request is not considered “reasonable” in the particular circumstances.
- In cases where deferring her studies would lead to a student taking longer to complete a degree programme than would normally be permissible, the School/Faculty may decline a request for further time out from studies (in order to ensure that the information gained in
previous parts of the programme remains current enough to count towards the qualification in question). However, in these circumstances the School/Faculty should still strive to demonstrate a flexible approach, where practicable, in relation to this deadline for programme completion, whilst ensuring that the student does not exceed the overall time limit allowed for her programme of study by the University or a relevant professional body.

- In some cases, it might be appropriate for a School/Faculty to show flexibility in relation to which modules count towards a particular qualification to accommodate a pregnant student, providing academic standards are upheld. In such circumstances normal procedures would need to be followed in terms of gaining approval for such changes e.g. via the School/Faculty or University's Quality and Standards Committee. In some situations, however, such flexibility could lead to a student missing a piece of work or module which is required for professional or vocational accreditation. Care should, therefore, be taken to check that any missed work will not adversely affect the accreditation of the student or, at the very least, the student should be made aware of the potential impact in terms of her future employability.

5. What advice is available on Study Abroad and Work Placements?

For students who become pregnant before or during a period of study abroad or a work placement there may be circumstances where the University is limited in the support it can realistically offer to the student. Where this is judged to present a particular risk to the student or her unborn child, she may be strongly advised to take time out or transfer to a different programme of study.

If a student becomes pregnant before, or during a period of study abroad, advice may be taken from the Study Abroad Office – tel: +44115 9515246

If a student becomes pregnant before, or during a work placement, advice should be sought from their School/Faculty Work Placement Support Tutor.

6. What support is available to staff members to help them to advise, or take a flexible approach to, a pregnant student?

Advice on adjustments to Exam arrangements for pregnant students or students with very young children may be sought from the University Examinations Office.
http://www.nottingham.ac.uk/academicservices/currentstudents/examinations/index.aspx

Advice on Programmes of Study, Extenuating Circumstances, Voluntary Suspension and Attendance Policies may be sought from Student Administration.
http://www.nottingham.ac.uk/academicservices/currentstudents/index.aspx

Support relating to health and safety issues

Advice on health and safety issues relating to pregnant students may be sought from a School/Faculty Safety Officer and/or University Safety Office.
www.nottingham.ac.uk/safety/guides.htm#Pregnancy

The University's HR department provide a link to the HSE guidance:
www.hse.gov.uk/mothers/faqs.htm
7. What support is available for a student whose partner is pregnant?

In most cases, full-time and part-time programmes are likely to be flexible enough to enable a student whose partner is pregnant, or whose partner is about to adopt a child, to take occasional breaks – perhaps to attend antenatal appointments with their partner and/or take some time to be with their partner around the time of the birth or adoption. All requests of this sort need to take into account the Attendance Policy. [www.nottingham.ac.uk/quality-manual/study-regulations/attendance.htm](http://www.nottingham.ac.uk/quality-manual/study-regulations/attendance.htm) (link broken - please advise)

However, sometimes a student – whether female or male – whose partner is pregnant or about to adopt may still wish to discuss this with their School/Faculty (normally their personal tutor/research supervisor) – especially if they feel that this may significantly affect their studies. In these circumstances, staff members are encouraged to demonstrate a degree of flexibility in terms of responding to the student’s circumstances – although such flexibility is only likely to extend to an occasional agreed absence (rather than anything as substantial as the suggestions listed in section 4, step 2 above).

Some funding bodies may allow a period of time for paternity leave. Students should refer to the terms and conditions relating to their award.

8. What support and facilities are available for a student who has recently become a parent?

Whilst the procedure proposed in section 4 above relates to a student during pregnancy, this also provides a helpful model for considering flexibility for a student (female or male) who has recently become a parent. As above, what constitutes a reasonable degree of flexibility to take account of a student’s caring/parental responsibilities will vary from Faculty to Faculty and from programme to programme.

There are also sources of practical support available, administered by either the University or SU, to assist parents with the costs associated with studying at this University. (Links to more information about these funds are provided in section 10.)

Adoption

Students who have been matched for adoption should inform their programme director, personal tutor, supervisor or a member of the student services team. If the student is the primary adopter, a plan should be developed in line with the guidance in the preceding pages. If the student’s partner is the primary adopter, upon formal adoption of the child, the student should be allowed time off from studies in line with the advice in the sections above on paternity-related absence. If a student has a stipend, NHS bursary or research council funding, they are likely to be allowed a period of paid adoption leave. Students should be advised to familiarise themselves with the terms and conditions of their award.

Childcare facilities on campus

Students should not normally bring their child with them into any public teaching areas – such as lecture theatres, seminar or teaching rooms – and so they will need to make arrangements for the care of their child whilst they are in these locations. (See Section 10 for details of the University nursery; Childcare Services which provides a service for children between the ages of 3 months and 5 years.)
Students may be accompanied by children in **general public areas** providing that their children are supervised at all times in accordance with the guidance given by the University Safety Office in http://www.nottingham.ac.uk/safety/child.htm. It is particularly important that children are not brought into areas where there is the possibility of a risk to health and safety. The University of Nottingham cannot accept any liability for the child in these circumstances.

Whilst there are no restrictions on feeding (bottle feeding or breastfeeding) at the University, there are currently no specific facilities available for these purposes or for the preparation of food or expression of milk. Should a student require a private space for these purposes, she can speak to her School/Faculty (normally her personal tutor/research supervisor) who should endeavour to provide a private, safe area for the student’s use. If a parent intends to feed her child regularly in a space provided by the School/Faculty, a further health and safety risk assessment should be considered. (see Section 10 for contact details).

**University accommodation**

The University has a small number of flats suitable for family accommodation, although there is generally a waiting list for these. For more information, students should contact Accommodation Services, http://www.nottingham.ac.uk/accommodation/accommodationoptions/universityhouses/universityhousesintro.aspx who can also provide advice to students about finding non-University owned family accommodation.

Some University accommodation will be unsuitable for children, or may, in some circumstances, be difficult for women in the later stages of pregnancy to access. If a student wishes to discuss such issues, s/he should approach the relevant Warden or Accommodation Services in the first instance. Pregnant students may also consider disclosing their pregnancy to the relevant Warden if they are concerned that they may need support in an emergency situation, such as early labour or miscarriage.

This guidance was drawn with permission from an existing document produced by the University of Leeds. The University of Nottingham is grateful for permission to base its own guidance closely on this document.
9. Where can I find further information?

Here are some sources of further information or support for students and staff members:

- **Access to Learning Fund** –
  [www.nottingham.ac.uk/studentservices/documents/alfformandguidance.pdf](http://www.nottingham.ac.uk/studentservices/documents/alfformandguidance.pdf)

- **Accommodation Services** –
  [www.nottingham.ac.uk/accommodation/accommodation.aspx](http://www.nottingham.ac.uk/accommodation/accommodation.aspx)

- **Chaplains** –
  [www.nottingham.ac.uk/chaplains/](http://www.nottingham.ac.uk/chaplains/)

- **Child Care Services** –
  [www.nottingham.ac.uk/child-care/home.aspx](http://www.nottingham.ac.uk/child-care/home.aspx)

- **Exam Arrangements** -
