Our medicine courses are some of the most popular in the country, offering innovative teaching and early interaction with patients. We ensure our doctors learn from experience, not exclusively from books and the internet.

We know that you are going to medical school to train to be a doctor, therefore we want to introduce you to patients and practical problems as early as possible. We have excellent links with local NHS trusts and are able to provide you with a varied placement experience with a catchment population of almost two million people.

Research within the school is wide-ranging, with 80% of our research judged as world-leading or internationally excellent in the Research Excellence Framework 2014.

In collaboration with Nottingham University Hospitals NHS Trust, we have recently been awarded £23.6m from the UK government to establish a Biomedical Research Centre (BRC). This will be the leading UK hub in five key areas of health research.

Thank you for considering the University of Nottingham. We hope to welcome you on to campus soon, and wish you luck with the rest of your studies.

Tony Avery
Dean of the School of Medicine

To find out where a degree in medicine could take you, please visit [nottingham.ac.uk/medicine](http://nottingham.ac.uk/medicine)
Studying medicine at Nottingham

Our medicine courses will develop you into a practising doctor. Upon graduation, you will be eligible to register provisionally with the General Medical Council (GMC) and begin the Foundation Programme.

Integrated BMedSci
At Nottingham, we offer an integrated BMedSci in the third year for BMBS Medicine students (this includes foundation students who progress to the five-year medicine course). The BMedSci involves undertaking a supervised research project, resulting in an additional degree. You'll benefit from a choice of topics, meaning you can tailor the project to your interests and future career aspirations. Working alongside research academics in the faculty, you'll gain the important skills needed for future research study.

Unlike other medicine courses, our BMedSci is integrated into the course, so you don't need to study an additional year.

At a glance
- Learn anatomy through experience of full-body dissection at one of the few UK universities to still offer this*
- Gain early interaction with patients from your first year, through regular visits to general practices and hospitals
- Have access to a catchment population of almost two million people across three counties, giving you contact with a wide-ranging patient community

Clinical placements
Clinical practice is an important element of your medical education. To give you a breadth of experience, you may be placed at any of the hospitals or general practices we work with across Nottinghamshire, Derbyshire and Lincolnshire. It is essential you gain clinical experience in a range of settings so you are prepared with the transferable skills needed for when you qualify. It is also advantageous to experience working in hospitals of different sizes and in different locations so that you have contact with various patient populations.

Explore the world
During clinical phase two of the BMBS Medicine course, students undertake a special study module, which allows some students to spend this four-week period on a student-led exchange in a European country. Past destinations have included Croatia, Germany, Slovakia and Spain. Students on all of our medical courses also have the opportunity to spend their compulsory elective period (clinical phase three) abroad, which has included destinations such as Africa, Australia, the Caribbean and Switzerland.

“From day one I’ve been able to get involved with everything from sports and music to charity work and speciality training – MedSoc offers something for everyone and I’ve loved my time at Nottingham so far!”
Kim Stallard, BMBS Medicine

<sup>4</sup> Please see pages 14-15 for specific entry requirements, including GCSE requirements.

English language requirements
IELTS 7.5 (no less than 7.0 in any element). For more information and a list of the alternative English language requirements we accept, please see nottingham.ac.uk/go/alternativerquirements

Developing your academic English and study skills
The Centre for English Language Education (CELE) offers you the opportunity to develop your English language skills at one of the world’s top universities. Accredited by the British Council for the teaching of English, CELE provides high-quality teaching, facilities and support.

Our presessional courses take your English language and academic skills to the level you need to progress to undergraduate study without taking IELTS again. Find out more at nottingham.ac.uk/cele

Fitness to practise
Offers are subject to the results of screening for hepatitis B and C, HIV, tuberculosis, two MMR vaccinations (or evidence of immunity to measles and rubella), and varicella vaccinations (or a history of having chicken pox). The University does not fund these, students are required to source these through their own GP. In addition, you will need to have an Occupational Health assessment.

Offers are also subject to a satisfactory Disclosure and Barring Service (DBS) check.

Over one-third of our UK students receive our means-tested core bursary, worth up to £2,000 a year. For details, see nottingham.ac.uk/financialsupport

BMBS Medicine (A100)
The course will begin with modules enabling you to understand the scientific and professional basis of medicine. In semesters two-four, you will be taught subjects in themes based upon an overarching clinical problem that will cover respiratory and cardiovascular medicine; cancer; musculoskeletal system; gastrointestinal medicine; endocrine and reproduction; renal; and the central nervous system.

You will also gain clinical experience in the early stages of the course through GP and hospital visits, encouraging professionalism from the outset. A feature of the early years will be plenary sessions related to each case, where you will have the opportunity to ask scientists and qualified doctors details of clinical outcomes related to the case, and hear more about their working environment.

In the third year, you will undertake a supervised research project of your choice, leading to the award of BMedSci. Following this, you will move into the clinical phases where you’ll rotate through a series of placements at major teaching hospitals within the region and in the community.

BMBS Graduate Entry Medicine (A101)
This four-year graduate entry medicine (GEM) course is open to home and EU applicants who want to study medicine but do not meet the normal academic requirements for entry onto the BMBS Medicine (A100) course and haven’t studied at a higher education institution before.

Following the initial 18 months, you will progress onto the clinical phases of the course, combining with students from BMBS Medicine. During the clinical phases, you’ll rotate through a series of placements at major teaching hospitals within the region and in the community.

BMBS Medicine with Foundation Year (A108)
The foundation year is for UK (or refugee status) applicants who want to study medicine but do not meet the normal academic requirements for entry onto the BMBS Medicine (A100) course and haven't studied at a higher education institution before.

While on the foundation year, you will study all the important elements of biology and chemistry required for your studies in years one to five. In addition, you will cover key topics in health psychology and population health and have your learning set in clinical context where appropriate.

You will undertake learning in fundamental subjects including anatomy, microanatomy and microbiology.

Study skills tuition supports the practical work you do, developing key skills in writing, information gathering, data analysis and examination success to name a few. We will also prepare you for a smooth transition to the five-year course via sessions with new tutors and visits to the dissection suite.
**Typical modules**

### BMBS Medicine (A100)

**Year one**
- Cancer
- Musculoskeletal and Trauma
- Professional Basis of Medicine
- Respiratory and Cardiovascular Medicine
- Scientific Basis of Medicine

**Year two**
- Core
  - Central Nervous System
  - Endocrine and Reproduction
  - Gastrointestinal Medicine
  - Integrated Module
  - Renal

**Year three**
- Core
  - Honours Year Project
  - Research Methods
  - The Treatment and Prevention of Infection
  - Clinical Phase 1 – Clinical Practice
  - Clinical Phase 1 – Therapeutics
  - Clinical Phase 1 – Community
  - Follow-Up Project

**Clinical phases (years four and five)**
- Clinical Phase 2 – Child Health
- Clinical Phase 2 – Community Based Medicine
- Clinical Phase 2 – Dermatology, Ophthalmology, Otorhinolaryngology (Specials)
- Clinical Phase 2 – Healthcare of Later Life
- Clinical Phase 2 – Obstetrics and Gynaecology
- Clinical Phase 2 – Psychiatry
- Clinical Phase 3 – Advanced Clinical Experience
- Clinical Phase 3 – Transition to Practice

### BMBS Graduate Entry Medicine (A101)

**First 18 months**
- Alimentary
- Cardiovascular
- Endocrine System
- Integrative
- Limbs and Back
- Neuroscience
- Personal and Development 1 and 2
- Problem-Based Learning Course
- Respiratory Sciences
- Structure, Function and Defense
- Urogenital System

After the first 18 months of the graduate entry medicine course, you will join the BMBS Medicine students on the clinical phases.

### BMBS Medicine with a Foundation Year (A108)

**Foundation year**
- Biochemical Processes
- Biological Molecules
- Body Processes
- Body Structure
- Cells and Tissues
- Health, Behaviour and Society
- Human Genetics
- Inorganic Chemistry
- Introduction to Microbiology
- Organic Chemistry
- Professional and Communication Skills
- Study Skills

After successfully completing the foundation year, you will join year one of the BMBS Medicine course.

Modules may change, for example due to curriculum developments. The above list is a sample of typical modules that we offer, not a definitive list. The most up to date information can be found on our website at [nottingham.ac.uk/ugstudy](http://nottingham.ac.uk/ugstudy).
Example timetables

Below are example timetables for the five-year medicine course and the four-year graduate entry medicine course. This gives you an idea of how your time may be spent, although each term can differ depending on the modules being studied.

The clinical phases

All medicine students take part in the clinical phases. For BMBS Medicine students, the clinical phases begin after the third-year BMedSci project. For BMBS Graduate Entry Medicine students, the clinical phases start after completing the 18 month problem-based learning course.

You will rotate through a series of placements at major teaching trusts and general practices in Nottinghamshire, Derbyshire and Lincolnshire. Experiencing different sites across the counties is an educational and beneficial feature of your training at Nottingham.

Currently, placements include general practices in the East Midlands and the following hospitals:

**Nottinghamshire**
- Queen's Medical Centre, City Hospital, Highbury Hospital, Nottingham
- King’s Mill Hospital and Millbrook Hospital, Mansfield

**Derbyshire**
- Royal Derby Hospital, Derby
- Chesterfield Royal Hospital, Chesterfield

**Lincolnshire**
- Lincoln County Hospital, Lincoln
- Grantham and District Hospital, Grantham
- Pilgrim Hospital, Boston

To watch a video tour of the Lincoln and Boston hospital sites, please visit nottingham.ac.uk/medicine/clinicalphases

To see an example timetable for BMBS Medicine with Foundation Year, please visit nottingham.ac.uk/medicine/teaching
Engaging study, incredible results

Alongside innovative classroom and practical sessions, you will be familiarised with patient contact and learn the principles of clinical history-taking and examination.

Teaching methods
We use traditional and electronic teaching methods to give you a varied learning experience. Typically you can expect:
- lectures
- seminars
- tutorials
- small-group learning
- case-based learning
- visits to general practices and hospitals
- full-body dissection
- simulated clinical skills
- laboratory sessions
- e-learning

Assessment methods
A range of assessments will be used depending on the module, including:
- multiple choice exams
- written exams
- essays
- coursework
- Objective Structured Clinical Exams (OSCEs)
- viva (spoken exam)
- presentations
- log books (tablet computer provided for this)
Assessments will take place at the end of each year rather than the module. This is to help reduce your exam workload.

Facilities
BMBS Medicine
For the first three years, you will spend the majority of your time studying in our Medical School. Based within the Queen’s Medical Centre (QMC) in Nottingham, the school is adjacent to the main campus of University Park. The two campuses are linked by a pedestrian footbridge giving easy access to University Park’s facilities. The Medical School houses large lecture theatres, a Clinical Skills Centre, an anatomy suite and a dedicated medical library.

BMBS Medicine with Foundation Year
and BMBS Graduate Entry Medicine
For the first part of your degree, you will study at our medical school at the Royal Derby Hospital. This modern, purpose-built building offers you all the facilities you need to study. There are laboratories, an anatomy suite, a clinical skills suite and a computer suite. Students can also access the NHS library.

Student support
From your first year, you will be allocated a personal tutor who will remain your tutor throughout the course. There is also the support of dedicated school Welfare Officers, Senior Tutors and Clinical Sub Deans. The student-led society, MedSoc, also provides peer mentoring. In year one, you will be matched with a second-year student who will support you throughout your course.

Key Information Sets
Key Information Sets (KIS) are comparable sets of information about full or part-time undergraduate courses and are designed to meet the information needs of prospective students. All KIS data is published on the Unistats website at unistats.co.uk

For more information about the teaching at Nottingham, please visit nottingham.ac.uk/medicine/teaching

For Nottingham’s KIS data, please see individual course entries at nottingham.ac.uk/ugstudy
How to apply

All applications for an undergraduate place to study at the University of Nottingham, including applications by international students, must be made through the Universities and Colleges Admissions Service (UCAS). Applications should be made online at ucas.com and candidates will be notified of decisions through UCAS Track.

The deadline for UCAS applications for all medicine courses is 15 October 2017 for entry in September the following year, or deferred entry. Please note, for graduate entry medicine we only offer deferred entry in exceptional circumstances and ask applicants to apply for the year they wish to study.

Details of how we assess your application and the different stages of the process for all our courses are in our admissions policy, which can be found on the online prospectus.

UKCAT and GAMSAT
Applicants must sit an admissions test for each of the three courses. The Clinical Aptitude Test (UKCAT) is a requirement for BMBS Medicine and BMBS Medicine with a Foundation Year. The Graduate Medical School Admissions Test (GAMSAT) is required for the BMBS Graduate Entry Medicine course. For full details please see the online prospectus at nottingham.ac.uk/ugstudy/medicine

Your personal statement
This is the section of your UCAS form that tells us most about you, and you should make the best use of it. Be as specific and detailed as you can – we would like to see that you are a student who can work hard, be self-motivated and make the best possible use of the opportunities that our courses offer you. We would also like to hear about any skills you have gained through extracurricular activities.

Entry requirements

BMBS Medicine with a Foundation Year (A108)

GCSEs
- At least five GCSEs at grade 5 (B), to include biology, chemistry, English language, maths and physics (or science double or triple award)

A levels
- Minimum of grades BBC at A level, studied over a two year period, including B grades in chemistry and biology and excluding general studies, critical thinking and global perspectives

This programme is open to British citizens who have only lived in the UK or those with refugee status. Applicants must meet the academic entry requirements and other requirements as detailed on the online prospectus. For more information, please visit nottingham.ac.uk/ugstudy/medicine

BMBS Medicine (A100)

GCSEs
- Minimum of six grade 7s (A*s) to include biology, chemistry and physics (or science double award)
- Minimum of grade 5 (B) in maths and English language

A levels
- Grades AAA at A level, in biology (or human biology), chemistry and a third subject (excluding general studies, critical thinking and global perspectives)

Degree
- Predicted or achieved 2:1 honours degree in a science based subject, plus the above A level grades

BMBS Graduate Entry Medicine (A101)
The four-year graduate entry medicine course (A101) is for graduates holding a 2:2 honours degree or higher in any discipline. This course is open to home and EU students only. A levels are not applicable.

GCSE reform
In keeping with the reform to GCSEs in England where subjects are to be graded from 9 to 1 instead of A* to G, we can confirm that in accordance with Ofqual recommendations, we will treat GCSEs graded numerically as GCSE grade A=7, B=6, C=5. GCSE qualifications taken outside of the UK will still be graded A* to G.

Alternative qualifications
In this brochure you will find our A level entry requirements but we accept a much broader range of qualifications.

These include:
- Cambridge Pre-U
- International Baccalaureate
- Irish Leaving Certificate
- Scottish Advanced Highers
- Welsh Baccalaureate Advanced Diploma

This list is not exhaustive; we will consider applicants with other qualifications on an individual basis. Please contact us to discuss the suitability of your qualification.

Flexible admissions policy
We recognise that some educational and personal circumstances affect achievement. If we judge that you have experienced circumstances that have adversely affected your achievement, we will consider them when assessing your academic potential.

Some courses may vary the offer as a result. For the most up to date information about our offers, please see the entry requirements section of our course pages on our online prospectus. For more information about this policy, please see nottingham.ac.uk/ugstudy/applying

Mature applicants
We encourage applications from mature applicants who have a significant gap in education. You should apply in the normal way through UCAS. More information for mature students can be found at nottingham.ac.uk/mature

International applicants
The University provides a range of information and advice for international applicants. If you are unable to attend an open day, we can meet you in your country at one of our overseas events or arrange an individual visit to the University. For further information, please visit nottingham.ac.uk/go/international-applicants

Deferred entry
A100 and A108 applicants who wish to defer their entry by a year will not be at a disadvantage. Please tell us something about your plans for your gap year in your UCAS personal statement.

Equal opportunities policy
The University aims to create the conditions whereby students and staff are treated solely on the basis of their merits, abilities and potential, regardless of gender, race, colour, nationality, ethnic or national origin, age, socio-economic background, disability, religious or political beliefs, trade union membership, family circumstances, sexual orientation or other irrelevant distinction.

Additional information
For additional information on applying, including the interview process, resists, work experience and age on entry, please visit nottingham.ac.uk/medicine/faqs
Be the first choice for your future employer

Medicine is a demanding yet extremely rewarding profession, giving you the opportunity to improve people’s health and even save lives.

100% of first-degree graduates from the School of Medicine who were available for employment had secured work or further study within six months of graduation.*

£27,462 was the average starting salary.*

There are a variety of career paths for qualified doctors. You could be working in the community as a GP or be based in a hospital working as a specialist doctor, consultant or surgeon. Find out more about the vast range of roles available at healthcareers.nhs.uk/explore-roles

Foundation training
The Foundation Programme is a structured, supervised workplace-based training programme typically made up of six four-month placements in a range of specialties and settings over two years.

In order to practise unsupervised as a doctor in the UK, you’ll need to complete one year of foundation training. Upon successful completion of Foundation Year 1, doctors can apply to fully register with the General Medical Council. Completion of the full two-year programme is required to progress to specialty training in the NHS.

Find out where Nottingham could take you and network with our graduates on LinkedIn.

Careers and Employability Service
Our Careers and Employability Service has a team dedicated to Faculty of Medicine and Health Sciences students. They will be on hand to offer you specialist support and guidance throughout your degree and for life after you graduate.

Whether you need help writing a CV, preparing for an interview or exploring career ideas, finding an internship or part-time work, you can book one-to-one appointments or come along to a workshop. Each term there is also an exciting events schedule, bringing you face-to-face with employers offering real-life insight into their professions.

The Nottingham Advantage Award
The award-winning Nottingham Advantage Award recognises and rewards your extracurricular activities. With a choice of over 200 modules, you can hone the key skills employers want. From developing your leadership skills and learning a language to public speaking and volunteering, you will leave university with demonstrable experience that sets you apart from other graduates.

* Known destinations of full-time home first-degree undergraduates 2014/15. Salaries are calculated based on those in full-time paid employment within the UK.
Experience it in a world beyond ordinary

There’s so much for you to get involved in and explore at the University and around the city. Whether you’re interested in sports, learning a language or just having fun with friends alongside studying, you’ll be spoilt for choice.

Getting involved in your Students’ Union
University of Nottingham Students’ Union (UoNSU) is a brilliant, diverse community, and whether you are an undergraduate or postgraduate, first-year or final-year student, you are a part of it. With 300+ student-led groups, clubs and societies, hundreds of volunteering opportunities and support for every stage of your university journey, your Students’ Union offers something for everyone. Find out more: su.nottingham.ac.uk

Exploring your new city
Nottingham city centre is around a 10-minute bus ride away from University Park Campus, so you’re always close to the action. There’s plenty of music venues from the world-famous Rock City, Motorpoint Arena or one of the smaller gig venues for a more intimate live show. If you enjoy shopping, there are independent boutiques and vintage shops as well as high street names in our large shopping centres. Nottingham is also a hotspot for dining, with a great choice of cuisines on offer. Find out more: nottingham.ac.uk/nottinghamlife

Sport
The University of Nottingham is one of the UK’s leading universities for sport and is currently ranked 4th in the university sport rankings*. We have one of the biggest portfolios of sports facilities in the country including the brand new £40m David Ross Sports Village. We also have a rich heritage of supporting Olympic medallists and we have more than 70 student sports clubs to choose from. Find out more: nottingham.ac.uk/sport

*British Universities and Colleges Sport Standings, 2015-16.

Your new home from home
At Nottingham we offer a wide range of room types across the campuses in both catered and self-catered accommodation. From standard single rooms with shared bathrooms to large en-suite studios and flats, there’s something to suit every budget and personal choice. For current pricing and to review all accommodation options please visit nottingham.ac.uk/accommodation

Your support network
Throughout your university journey there will be numerous people on hand to support and advise you, including tutors and dedicated staff. We have Student Service Centres on all three of our UK campuses, which provide a range of support, information and specialist services. Find out more: nottingham.ac.uk/studentservices

Learn a language
The University’s Language Centre gives you the opportunity to study a language alongside your course. All languages are offered from beginners’ level with some going up to near native competency. There are nine languages to choose from: Modern Standard Arabic, Dutch, French, German, Italian, Japanese, Mandarin Chinese, Russian, and Spanish. Find out more: nottingham.ac.uk/language-centre

Music
All student musicians at the University of Nottingham are encouraged to get involved with the vibrant musical life on campus. Find out more: nottingham.ac.uk/music/performance
