Welcome to the Division of Physiotherapy and Rehabilitation Sciences

The University is well known for its physiotherapy programme; not only is it one of the most popular courses at Nottingham, it is also one of the most popular places to study physiotherapy in the UK. Our sport rehabilitation course, launched in 2014, is increasingly popular among applicants.

We believe that this popularity is based on our reputation for providing education within a supportive and nurturing environment, which not only develops the individual, but produces first-class physiotherapists and sport rehabilitators.

Our aim is to develop graduate physiotherapists and sport rehabilitators with excellent knowledge and skills that are ideally suited to develop successful careers in healthcare, sport or leisure industries.

We are extremely proud of our graduates and they are much sought after by potential employers. Our graduates are a major factor in our continuing popularity, acting as testament to what we set out to achieve.

I look forward to welcoming you in September.

Grahame Pope
Head of the Division of Physiotherapy and Rehabilitation Sciences

To find out where a degree in physiotherapy or sport rehabilitation could take you, please visit nottingham.ac.uk/healthsciences
Studying physiotherapy or sport rehabilitation

Whilst physiotherapists work with a diverse range of patient and client groups, sport rehabilitators predominantly work within a sport and exercise environment to prevent injury, and rehabilitate and return injured individuals back to exercise and sport.

Support and encouragement
We promote a challenging yet supportive and informal atmosphere within the division. The support and encouragement we are able to offer as a small division has helped 100% of our graduates from the last seven years to achieve a first or second-class honours degree.

Professional recognition
The physiotherapy degree at Nottingham is recognised by the Chartered Society of Physiotherapy (CSP). On graduation, students are eligible to apply for both full membership of the CSP and registration with the Health and Care Professions Council (HCPC).

The sports rehabilitation course is accredited by the British Association of Sport Rehabilitators and Trainers (BASRaT). The BASRaT register has been approved as an accredited register by the Professional Standards Authority for Health and Social Care. Students registered on the course and graduates are eligible to apply for membership of BASRaT.

At a glance
- Work closely with other healthcare students to develop your interprofessional skills
- Experience a mix of teaching and clinical practice, giving hands-on context to what you learn
- Have the opportunity to work internationally on a three week elective placement, experiencing your subject in another country

English language requirements
IELTS 7.5 (no less than 7.0 in any element). For more information and a list of the alternative English language requirements we accept, please see nottingham.ac.uk/go/alternative_requirements

Developing your academic English and study skills
The Centre for English Language Education (CELE) offers you the opportunity to develop your English language skills at one of the world’s top universities. Accredited by the British Council for the teaching of English, CELE provides high-quality teaching, facilities and support. Our preessional courses take your English language and academic skills to the level you need to progress to undergraduate study without taking IELTS again. Find out more at nottingham.ac.uk/cele

* British Universities and Colleges Sport Standings 2016-17.
*** BSc Physiotherapy, National Students Survey 2016.
Our physiotherapy course aims to prepare students in the areas of practice needed to work as a newly qualified physiotherapist. Students will be expected to exercise sound judgement in a variety of clinical situations using a patient-centred approach.

Year one
This year provides the fundamental basis of the academic concepts and practical skills required for professional practice. This includes; anatomy, physiology, common musculoskeletal conditions, basic research skills and an introduction to professional development and are taught alongside the sport rehabilitation students.

There are no placements in year one, as the course focuses on skills training to equip you with the expertise necessary to undertake your first placement in year two.

Year two
The second year is about building on the basic knowledge and practical skills acquired in year one. You will be introduced to a variety of pathological conditions and their management via academic study and four blocks of supervised clinical experience, which are four weeks long. The first placement takes place in the November of year two.

Year three
The flexible approach that we offer in year three enables you to select a course of study based on your interests.

The choice available in the academic modules also extends into one of the four clinical placements, where you can choose from a variety of special interests, including:
- adult learning disabilities
- burns and plastics
- mental health
- oncology
- paediatrics
- rheumatology
- women’s health

As with year two, your time will be divided between academic study and clinical practice.

Dissertation project
Every student undertakes a project in their third year. This can be a laboratory-based investigation, a survey, a clinical investigation, an educational development or a literature review. We actively encourage students to publish their work or present at conferences.

BSc Sport Rehabilitation

This course aims to equip graduates with the knowledge, skills and flexibility to work independently in a range of sporting, health, rehabilitation and exercise environments.

Year one
This year provides the underpinning academic concepts and practical skills required for professional practice. These include anatomy, physiology and human movement and are taught alongside physiotherapy students. Marks gained in the qualifying year do not count towards your overall degree classification.

There are no placements in year one, as the course focuses on skills training to equip you with the expertise necessary to undertake your first placement in year two.

Year two
This year is divided between academic study and a clinical placement in a sport rehabilitation or exercise related setting. You will further develop your knowledge and skills in the management of sports injuries plus key concepts in injury prevention, nutrition and exercise physiology for performance enhancement.

Year three
In addition to six weeks of clinical placement and compulsory year-long modules, which includes a research project, we offer a choice of two optional modules per semester. In year three, you will also undertake an exciting community-based module that you can develop in an approved area related to sport, exercise, health or wellbeing. This may be within a charity, school, occupational setting or other community project.

Dissertation project
Every student will undertake a project in year three. This may be a laboratory-based investigation, a survey, an educational development or a literature review of your choice. Topics will also be suggested by staff and a supervisor will be allocated to you to guide you through the process. Students who submit work of a sufficient quality will be encouraged to present it at a conference or have it published post-graduation.

You will also undertake a recognised Emergency Sports First Aid qualification during the course, to enable you to undertake pitchside cover.

Some optional modules may also be chosen from those listed in the BSc Physiotherapy programme. Modules may change, for example due to curriculum developments. The above list is a sample of typical modules that we offer, not a definitive list. The most up-to-date information can be found on our website at nottingham.ac.uk/ugstudy

For more detailed course content, visit nottingham.ac.uk/ugstudy/sportrehab
Engaging study, incredible results

Teaching and learning methods
For both courses, the first two years are taught in a similar way. Each week, new topics will be introduced using a variety of methods including lectures, tutorials and practicals, supported by online resources.

In year three, students on both courses undertake optional modules which are usually delivered via a variety of methods for six full days over a semester. By the time you reach year three, you are expected to be a more independent learner with more time to manage and complete your research project.

Within our courses, each module is assessed and must be passed in order to progress to the next year, or graduate. We recognise that students benefit from being assessed using a variety of different and innovative methods, therefore we choose the most appropriate method of evaluation based on the module.

Tutorials and support
With a small student intake, we can foster an informal, friendly and open environment that is beneficial to students. A low student to teacher ratio is something we feel is particularly important when learning practical skills, which are a large part of our courses.

On arrival at University, you will be allocated a personal tutor who will work with you throughout the whole of your degree programme. Through regular meetings you will have the opportunity to discuss your academic progress, including assessment feedback, or seek confidential support and advice on any other matters of concern.

Placements
For the duration of each placement, you are allocated an experienced physiotherapist or sport/exercise professional who will supervise, guide and support you, aiming to provide the best learning environment possible. The assessment process is continual and is undertaken by the supervising clinician in conjunction with an academic tutor, who visits each student during the placement period.

Below is an example first year timetable for physiotherapy and sport rehabilitation students to give you an idea of how your time may be spent

Library and computing services
At Nottingham, you will benefit from access to an extensive collection of printed and online library resources. In addition, you will have both on and off campus access to a very wide range of databases, ejournals and ebooks.

You will have access to specialist physiotherapy, rehabilitation and sports medicine texts at both the Greenfield Medical Library at the Medical School, and the City Hospital Library on site close to the Clinical Sciences Building (CSB).

Key Information Sets
Key Information Sets (KIS) are comparable sets of information about full or part-time undergraduate courses and are designed to meet the information needs of prospective students. All KIS data is published on the Unistats website: unistats.co.uk

For Nottingham’s KIS data, please see individual course entries at nottingham.ac.uk/ugstudy

For more information about the teaching at Nottingham, please visit nottingham.ac.uk/healthsciences/teaching
Learning environments

The majority of teaching takes place in the Clinical Sciences Building at Nottingham City Hospital.

The Clinical Sciences Building is purpose-built and contains a 200-seat lecture theatre, various seminar and tutorial rooms, a computer suite, a quiet area and common room, and four practical rooms. These are stocked with all the equipment necessary for practical skills teaching, including:

- movement analysis equipment
- electrotherapy
- exercise based equipment including gym balls, weights and balance equipment
- manikins equipped for respiratory teaching

A human performance laboratory is also based on site and is used for the analysis of human movement and biomechanics.

City Hospital campus
The City Hospital has a wide range of regional and national centres, which contribute to both the academic and clinical teaching. These include:

- a burns and plastics unit
- a specialist renal unit
- cardiac/thoracic centre

Other campuses
Students also spend a portion of their time at the Queen’s Medical Centre hospital, Nottingham, where facilities include:

- a children’s hospital
- laboratories and dissection rooms in the School of Biomedical Sciences
- clinical skills suite

There is also a functional training suite at Jubilee Sports Centre, where students can develop more advanced sport-specific exercise and rehabilitation programmes.

Sport at Nottingham
We have one of the biggest portfolios of sports facilities in the country, including the brand new £40m David Ross Sports Village, which has seminar rooms, a sports injury and rehabilitation clinic and a hydrotherapy pool to provide additional teaching and practical experience for students.

I feel very privileged to study sport rehabilitation as we are taught by lecturers who are very experienced in their field. The course is extremely hands on and the closeness of the small group really enhances learning.

Sarina Rizk-Diab, BSc Sport Rehabilitation

Find out more about how you will be taught at nottingham.ac.uk/healthsciences/careers

The facilities are incredible at City Hospital. When doing practical classes we work in small groups so there’s a good staff to student ratio.

Sarah Needham, BSc Physiotherapy
The clinical programme

Physiotherapy
In order to comply with the Chartered Society of Physiotherapy (CSP), each student must undertake a minimum of 1,000 hours of supervised clinical experience. At Nottingham, this is divided into eight four-week placements plus a three-week elective placement at the very end of the course. Each week comprises 36 hours, and while there are no weekend or night shifts, the times for each placement may vary slightly.

All core clinical placements are arranged for students by our team of clinical link tutors and take place in Derbyshire, Leicestershire, Lincolnshire and Nottinghamshire. As placements are split over four counties, we do our best to arrange them so that no individual does more than their fair share of travelling or living out.

Your final clinical placement is elective, which you will organise. This can take place anywhere in the world, providing you find a supervisor who is eligible for registration with the Health and Care Professions Council and that the country is safe to travel to.

Sport rehabilitation
In order to comply with the requirements of the British Association of Sport Rehabilitators and Trainers (BASRaT), students are required to complete a minimum of 400 hours of supervised clinical placement during the course.

At Nottingham, you will undertake approximately 460 hours of clinical placement. Placements will be in environments where a sport rehabilitator would be expected to find employment, for example in private clinics and sports clubs. You will be continually assessed and the marks count towards your final degree classification. Please note you may be required to work unsociable hours, including some weekends and evenings, depending upon the placement.

Placements will be arranged for you and will be based predominantly in the East Midlands. It may be necessary to live out or travel daily; however, we do our best to arrange them so that no student does more than their fair share of travelling or living out.

Some placements may be further afield as we have contacts with a number of professional sports clubs in other regions. You will be required to fund any accommodation and/or equipment expenses.

A three-week elective placement provides an additional opportunity to work in an area of interest anywhere in the world (as long as it is supervised appropriately), and increase the number of pre-graduation clinical hours undertaken.

For more detailed information about placements, please visit nottingham.ac.uk/healthsciences/clinical
Fees and finance

The University of Nottingham offers a wide range of bursaries and scholarships. These funds can provide you with an additional source of non-repayable financial help.

Sports bursaries
As well as a reputation for academic excellence, we have a history of sporting success and are passionate about supporting promising athletes during their time at Nottingham.

If you are a talented athlete, you might be eligible for a sports scholarship which provides financial and specialist support to help you maximise your sporting potential. To find out more, please visit nottingham.ac.uk/sport/scholarships

Course costs
Students should be aware that certain items or requirements of the course will lead to additional costs. The following are examples of these items:

- **Uniform**: clinical uniforms (physiotherapy), or University branded sportswear (sport rehabilitation), are required for both clinical exams and placements. Practical classes require you to be dressed appropriately. We have a supplier who provides a range of clothing which can be ordered prior to starting the course. These should arrive during Welcome Week (week one).
- **Skeleton**: we loan a half skeleton to each first year student for a non-refundable hire fee of £30.
- **Books**: purchase of books is not compulsory, and all core texts can be found in both the City Hospital and University libraries.
- **Photocopying/inter-library loans/printing**: during the course, you will incur some costs associated with these items, although students receive a set amount of free printing credit each academic year.
- **Footwear (sport rehabilitation)**: trainers are appropriate for most practical and exercise classes however you may need to purchase additional footwear, e.g. football boots for working pitchside on placement.

For up to date information regarding tuition fees, visit nottingham.ac.uk/fees

Find out more about fees and finance nottingham.ac.uk/healthsciences/finance

Over one-third of our UK students receive our means-tested core bursary, worth up to £2,000 a year. For details, visit nottingham.ac.uk/financialsupport
How to apply

All applications for an undergraduate place to study at the University of Nottingham, including applications by international students, must be made through UCAS.

Applications should be made online at ucas.com and candidates will be notified of decisions through UCAS using UCAS track.

Your personal statement
This is the section of your UCAS form that tells us most about you, and you should make the best use of it. Be as specific and detailed as you can – we would like to see that you are a student who can work hard, be self-motivated and make the best possible use of the opportunities that our courses offer you. We would also like to hear about any skills you have gained through extracurricular activities.

Academic requirements
BSc Physiotherapy:
GCSEs
Minimum of six subjects at level 7 (A) or level 5 (B) grades to include maths, English language and either biology or integrated/combined sciences.
A levels
ABB in three A levels, one of which must be in biology or physical education, or acceptable biological science, i.e. human biology. General studies is not accepted. A pass is required in science practical tests, if assessed separately.

Alternative qualifications
In this brochure you will find our A level entry requirements, but we accept a much broader range of qualifications.

These include:
- Access to HE Diploma
- Advanced Diploma
- BTEC HND/HNC
- BTEC Extended Diploma
- Cambridge Pre-U
- International Baccalaureate
- Irish Leaving Certificate
- Scottish Advanced Highers
- Welsh Baccalaureate Advanced Diploma

This list is not exhaustive; we will consider applicants with other qualifications on an individual basis. Please contact us to discuss the suitability of your qualification.

Mature applicants
We encourage applications from mature applicants who have a significant gap in education. You should apply in the normal way through UCAS. More information for mature students can be found at nottingham.ac.uk/mature

Flexible admissions policy
We recognise that some educational and personal circumstances affect achievement. If we judge that you have experienced circumstances that have adversely affected your achievement, we will consider them when assessing your academic potential. Some courses may vary the offer as a result. For the most up to date information about our offers, please see the entry requirements section of our course pages on our online prospectus. For more information about this policy, please see nottingham.ac.uk/ugstudy/applying

International applicants
The University provides a range of information and advice for international applicants. If you are unable to attend an open day, we can meet you in your country at one of our overseas events or arrange an individual visit to the University.

Deferred entry
Applicants who wish to defer their entry by a year will not be at a disadvantage. Please tell us something about your plans for your gap year in your UCAS personal statement.

Work experience
Please note your application is likely to be rejected in the initial stages if you have not undertaken work experience. We have provided more information on the types of work experience we accept online, at nottingham.ac.uk/healthsciences/workexperience

Criminal offences and other related matters
Offers are subject to satisfactory DBS clearance. The University is required to use the DBS to assess the suitability of applicants for physiotherapy and sport rehabilitation. Information held by the DBS will be considered on an individual basis and will be handled and disposed of securely in compliance with legislation.

Full details on DBS checks can be found at nottingham.ac.uk/healthsciences/dbs

Students with disabilities or health concerns
Disabilities and health concerns do not necessarily form a barrier to entry onto the BSc Physiotherapy or BSc Sport Rehabilitation. In line with the Special Educational Needs and Disability Act (2001) we ensure that all students fairly, offering ongoing support and making reasonable adjustments where necessary.

However, we have a responsibility to ensure that all students admitted to our courses will be able to meet the standards of proficiency set out by the governing bodies of the professions.

For more information, please visit nottingham.ac.uk/healthsciences/disability

Admissions process
We have a transparent selection process through which we aim to select the highest calibre of applicant in order to make offers. This selection process is free from discrimination of any kind and is outlined online at nottingham.ac.uk/healthsciences/seleciton

Equal opportunities policy
The University aims to create the conditions whereby students and staff are treated solely on the basis of their merits, abilities and potential, regardless of gender, race, colour, nationality, ethnic or national origin, age, socio-economic background, disability, religious or political beliefs, trade union membership, family circumstances, sexual orientation or other irrelevant distinction
World class for employability

We have a reputation for producing well qualified, highly skilled and competent therapists at Nottingham. Our graduates find employment in many areas of healthcare and sport.

Career opportunities for physiotherapists are diverse within both the NHS and the private sector. Sport rehabilitators are employed predominantly in sport and exercise environments, with increasing opportunities within private practice, sports teams and military rehabilitation.

Physiotherapists

Most physiotherapists in the UK work within the wide range of specialities offered by the NHS, including:

- burns and plastics surgery
- healthcare of the elderly
- maternity
- mental health
- neurology
- orthopaedics
- out-patients
- paediatrics
- respiratory
- women’s health

However, there are many other settings in which our graduates work including academia or research, charitable organisations, industry, social services, special schools, sports centres, the armed forces and veterinary practice.

A newly qualified physiotherapist working in the NHS can expect to be employed at Band 5 with a minimum salary of £22,128**.

Sport rehabilitators

Graduate sport rehabilitators have a sound knowledge of the fundamentals of sport rehabilitation, experience of relating theory to practice and utilising skills in a practical setting on placements.

Graduates work in private clinics or sports clubs, but many also work in Ministry of Defence rehabilitation centres with injured servicemen and women, including amputees. Some return to academia to undertake research and teach.

New graduates can expect to earn in the region of £20,000 and upwards depending on the role. Many are employed on NHS grades commencing at Band 5 with a minimum salary of £22,128**.

The University’s Careers and Employability Service

Our Careers and Employability Service has a team dedicated to Faculty of Medicine and Health Sciences students. They will be on hand to offer you specialist support and guidance throughout your degree and for life after you graduate.

Whether you need help writing a CV, preparing for an interview or exploring career ideas, finding an internship or part-time work, you can book one-to-one appointments or come along to a workshop. Each term there is also an exciting events schedule, bringing you face-to-face with employers offering real-life insight into their professions.

The Nottingham Advantage Award

The award-winning Nottingham Advantage Award recognises and rewards your extracurricular activities. With a choice of over 200 modules, you can hone the key skills employers want. From developing your leadership skills and learning a language to public speaking and volunteering, you will leave university with demonstrable experience that sets you apart from other graduates.

For further information, please visit nottingham.ac.uk/careers/advantage

Postgraduate study

The division runs a programme of MSc degrees in specialist areas of physiotherapy and students often return to complete these.

£22,681 was the average starting salary for our graduate physiotherapists, with the highest being £27,500.*

100% of first-degree graduates from physiotherapy who were available for employment had secured work or further study within six months of graduation.*

*Known destinations of full-time home first degree undergraduates 2014/15. Salaries are calculated based on those in full-time paid employment within the UK.

** Correct as of 1 April 2017.

Find out where Nottingham could take you and network with our graduates on LinkedIn.
Experience it in a world beyond ordinary

There’s so much for you to get involved in and explore at the University and around the city. Whether you’re interested in sports, learning a language or just having fun with friends alongside studying, you’ll be spoilt for choice.

Getting involved in your Students’ Union

University of Nottingham Students’ Union (UoNSU) is a brilliant, diverse community, and whether you are an undergraduate or postgraduate, first-year or final-year student, you are a part of it. With 300+ student-led groups, clubs and societies, hundreds of volunteering opportunities and support for every stage of your university journey, your Students’ Union offers something for everyone. Find out more: su.nottingham.ac.uk

Exploring your new city

Nottingham city centre is just a 10-minute bus ride away from University Park Campus, so you’re always close to the action. There are plenty of music venues, from the world-famous Rock City to the Motorpoint Arena or one of the smaller gig venues for a more intimate live show. If you enjoy shopping, there are independent boutiques and vintage shops as well as high street names in our large shopping centres. Nottingham is also a hotspot for dining, with a great choice of cuisines on offer. Find out more: nottingham.ac.uk/nottinghamlife

Your new home from home

At Nottingham we offer a wide range of room types across the campuses in both catered and self-catered accommodation. From standard single rooms with shared bathrooms to large en-suite studios and flats, there’s something to suit every budget and personal choice. For current pricing and to review all accommodation options please visit nottingham.ac.uk/accommodation

Sport

The University of Nottingham is one of the UK’s leading universities for sport and is currently ranked 4th in the university sport rankings*. We have one of the biggest portfolios of sports facilities in the country including the brand new £40m David Ross Sports Village. We also have a rich heritage of supporting Olympic medallists and we have more than 70 student sports clubs to choose from. Find out more: nottingham.ac.uk/sport

*British Universities and Colleges Sport Standings, 2015-16.

Your support network

Throughout your university journey there will be numerous people on hand to support and advise you, including tutors and dedicated staff. We have Student Service Centres on all three of our UK campuses, which provide a range of support, information and specialist services. Find out more: nottingham.ac.uk/studentservices

Learn a language

The University’s Language Centre gives you the opportunity to study a language alongside your course. All languages are offered from beginners’ level with some going up to near native competency. There are nine languages to choose from: Modern Standard Arabic, Dutch, French, German, Italian, Japanese, Mandarin Chinese, Russian, and Spanish. Find out more: nottingham.ac.uk/language-centre
