What does being a Judge for the Electrical and Electronic Engineering Year 1 project entail?
Throughout the year Electrical and Electronic Engineering students have 7 dedicated project weeks working in groups to design and develop an automated vehicle.

We’re looking for judges to take part in the EEE Year 1 project showcase that involves a series of competitions to challenge the vehicles to see if, for example, they are able to reach certain speeds and achieve required stopping distances.

The showcase is an ideal opportunity for alumni and employers to find out about new course changes and the enhanced practical experience the students gain as a result. It is an excellent opportunity for alumni and future employers to speak to students in an informal setting early on in their university career.

No specific training will be needed.

When does the opportunity take place?
Date: Friday 4 May 2018
Time: 12:30 – 4pm
Location: Engineering and Science Learning Centre Foyer, University of Nottingham

Who could be a Judge for Electrical and Electronic Engineering Year 1 project?
We’re looking for enthusiastic volunteers who:

- Have knowledge and an appreciation of the Electrical and Electronic Engineering course
- Are able to talk to students either individually or as groups to discuss different aspects of the project and the vehicle design
- Can give judging feedback that is constructive and emphasise positive aspects
- Can offer encouragement and positive suggestions for improvements

Interested?
Please complete an application form to apply. A member of the Team will then be in touch to discuss your application in more detail.
