**O'LENTIL**

**NICK BUCKINGHAM**

Professional Chef  
Creator of O'Lentil

“The Versatile Protein”

- **As a professional chef in hotels and restaurants I was often in need of a protein source for vegetarians and vegans with a texture that could be cut.**
- **As there was nothing on the market at the time I developed O'Lentil – a very versatile protein ingredient. My vision was to create a tasty, unique, easy to use and cook, plant based protein food that can be used by all. The new convenience food.**
- **At the moment it is produced in “Slice & Dice” and chub formats for the catering outlets. 1 kg, 2 kg and 4 kg chubs are for commercial and manufacturing uses. We are now producing a 350 gram Slice & Dice for the retail sector.**

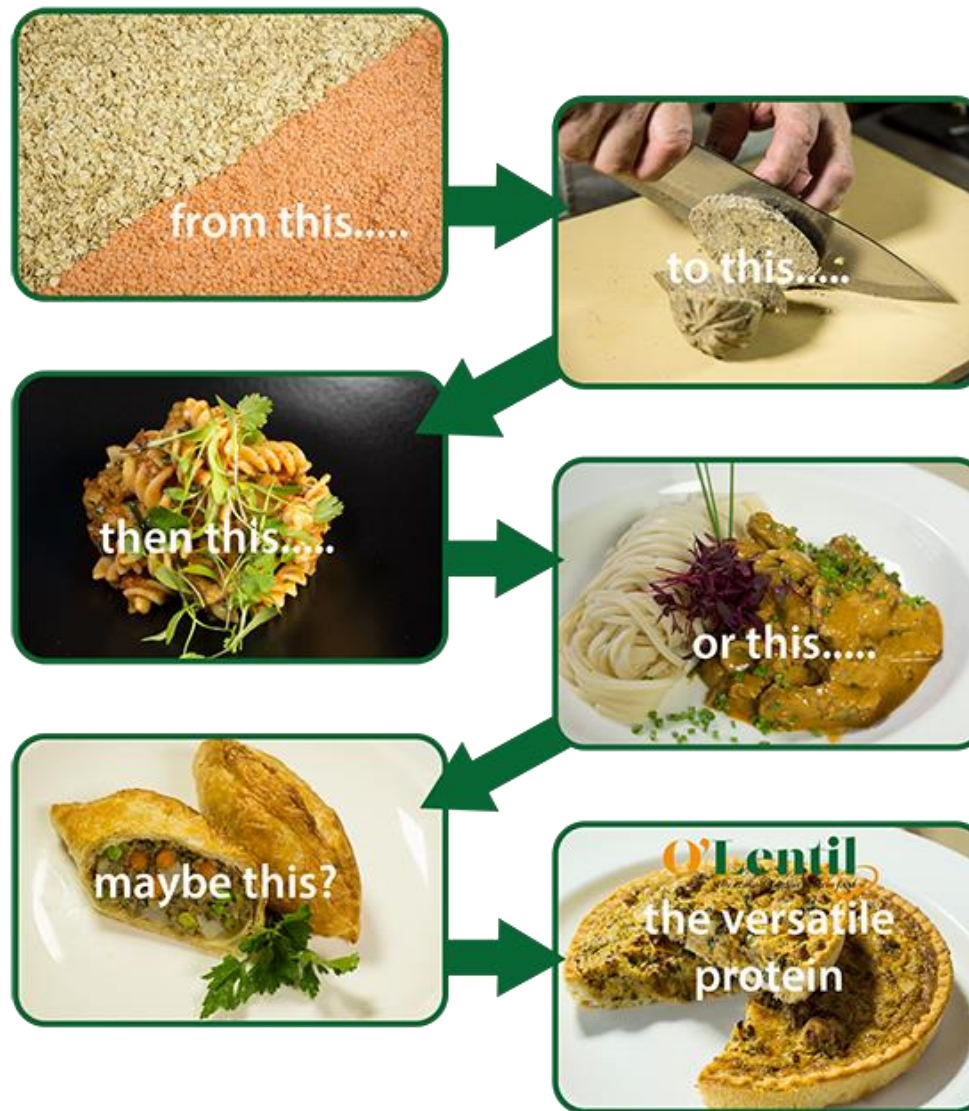

- **O'Lentil is a versatile protein made from oats, lentils, herbs and spices with a texture that is easy to cut. It is steam cooked, easy to use in recipes, and currently used to produce sausages. The 350g Slice and Dice as the future format of choice.**
- **It is available in 2 flavour's', original and Mediterranean, with several more in development.**
- **O'Lentil is a healthy alternative to other protein sources and can be consumed straight from the packet or cooked as part of a recipe. It is a suitable protein source for vegetarians and vegans.**
- **It is low in fat, salt and contains no sugar, high in fibre with no colouring or preservatives.**
