

Congratulations on securing a place at the University of Nottingham's School of Biosciences. You will be mainly based on the University Park campus although some of your studies will take place at the Sutton Bonington campus which is located 10 miles south of the city. I am sure that you will enjoy life on the University Park Campus, where you will be joining a community of motivated and supportive students with staff committed to provide a first class learning and teaching environment.

The academic reputation of the School of Biosciences is second to none in the UK and I hope that you will soon start to reap the benefits of working in an environment at the cutting edge of research and teaching in fundamental and applied aspects of the biological and physical sciences. You will also have the opportunity to select modules from other Schools in the University.

You will find information enclosed, and on-line, designed to help you get a feel for life as a student at University Park and, in particular, details of what awaits you during the first week of your University life. In addition, information on what documents you may need to bring with you on your arrival is provided. Please read through this, but don't let yourself be daunted by it – there will be many staff and students around to help you settle in. Further information about services and facilities on the campus will be provided on your arrival and administrative support will be available either through our staff at University Park or the School Office at Sutton Bonington.

In the meantime, if you have any questions, please contact us. Tel: (+) 44 (0) 115 74 86500
