

Short Courses in Sensory Science:

Consumer Sensory Science - qualitative, quantitative and topical techniques

24-28 June 2019, University of Nottingham, Sutton Bonington campus

Introduction

Have you ever wondered why your company carries out consumer testing the way it does?

Are you aware of the current issues facing consumer testing? Are there newer approaches or methodologies which your company may benefit from?

Or do you simply want to update your own knowledge?

This 4 day module, delivered jointly by the University of Nottingham and Campden BRI, introduces delegates to factors affecting consumer acceptance of food and the application of techniques used to understand them.

Aims and Objectives

By the end of the course delegates will be able to:

- Define the factors shaping consumer acceptance.
- Review the methods available for determining consumer acceptance and attitudes and their pros and cons.
- Demonstrate how these principles can be utilized for improved NPD (New Product Development).

Content

- Factors affecting food choice / drivers of liking / context / expectation.
- Qualitative research methods including focus groups and associated results analysis.
- Quantitative research methods including questionnaire design and results analysis.
- Advanced techniques: Elicitation techniques, Emotional Measures, Preference Mapping, Conjoint analysis and Willingness to Pay Auctions

Teaching Team

- Dr Rebecca Ford, Associate Professor in Sensory Science at the University of Nottingham
- Guest lecturers from industry.

Cost and Registration

The cost of the module for 2019 is £1840 (no VAT).
