Your task

In this part you are asked to split £6 between you and WWF's Climate Recovery Fund. We will multiply the amount you allocate to WWF by 1.5 and will donate it directly. All Climate Recovery Fund donations will go towards climate projects that can help the world to recover from the impacts of climate change.

What you keep for yourself is the only payoff you receive for today's experiment.

You can allocate money to WWF in whole or half amounts of pounds (e.g., 0, 0.5, 1, 1.5, 2...). If you want to receive more information about the Climate Recovery Fund you can read the overview section at the bottom of the page.
