

Bonsall History Trails and Guides

The Bonsall History Group wants to develop six historical walking trails and guides for all ages to help discover the history of our village. These trails will be designed following a series of community events, visits and public meetings at which residents will help identify features of special heritage interest in Bonsall. Using walk leaflets, people will be able to explore the frameknitting workshops, the lead mining heritage, the locations of old shops, pubs and trades, and the way in which the local geology and farming practices have affected the landscape and flora around Bonsall. The Group's website will be redesigned to include additional information to support the walk leaflets.
