

Computer specifications for online courses

Software requirements

The only software (beyond a reasonably modern web browser - see below) you might need is word-processing software for the production of your written work. Many of you will already be using Microsoft Word, and this is fine. Microsoft Office is currently available to our students free of charge.

Whatever word-processing software you use, written work should be saved in the .doc, or .docx formats before submission.

General system requirements

To access our online materials from home or any other off-campus site you will need to have the following:

- A computer with internet access and broadband speed connectivity
- Speakers or headphones
- an up to date version of one of the following web browsers:
 - Chrome
 - Firefox
 - Safari
 - Internet Explorer (IE 10.+)
 - Microsoft Edge
