Conversations in a discipline

Global

PURPOSE OF ABSTRACT

PURPOSE

**Helps
reader
decide
whether to
read the
article (ie, is
this
important
to me?)**

**Directs readers' attention to
the highlights of the article**

**Provides reminders for readers
after they've read the article**

**Reflects on the professionalism
& integrity of the work**

Characteristics of a good abstract

**Accurate, coherent,
& readable**

**Concise, specific
& selective**

**Self-contained,
ie, stand alone**

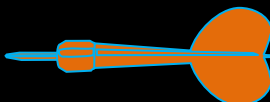

Structuring an Abstract

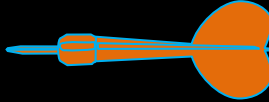

Where? LOCATE: in the context of the discourse community or field in general

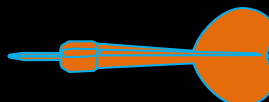

Why? FOCUS: Questions, issues, challenge, gap explored, examined or investigated

How? ANCHOR: Outline methodology for credibility, trustworthy & replicability

What? REPORT: Key findings or evidence to inform argument that follows

So What? ARGUE: Theorize, extrapolate, speculate, recommend, demonstrate contribution

EXAMPLE

5

ARGUE: The paper argues that... & concludes by suggesting that....

4

REPORT: Findings reveal that...

3

ANCHOR: We draw on findings from a study of... which used... to show that...

2

FOCUS: This paper focusses on

1

LOCATE: Blended learning has become a significant issue (in/for)...

FOCUS FOR REVIEWERS

What is the argument? Is it clear &/or can it be made stronger?

Does it report the findings/evidence & provide the key to the argument that follows?

Does the abstract anchor the research that, in terms of its methods & design?

Has the abstract focused the topic of the paper & identified the research conducted?

How well is the work located in the discipline/policy/practice issues/problems

Is the abstract coherent with connections between each of them?

TYPES OF ABSTRACTS

Descriptive

Indicative

Informative

Extended

Structured

**Executive
Summary**

Descriptive “Pap” Abstracts

Indicate the scope of the findings

Contain little substantive information

Emphasize the report itself, not its contents

“A study was undertaken, the data were accumulated, & some interesting observations were made. Our conclusions are given.”

Example of Descriptive Abstracts

Our report describes a novel agricultural approach to improve crop yield & sustainability.

We highlight key techniques & strategies employed in this innovative method.

Furthermore, we discuss the potential benefits of adopting this approach. The abstract offers a glimpse into the transformative potential of this agric approach in addressing current challenges & fostering sustainable food production.

Indicative Abstracts – Review Articles

**State
objective
of
review**

**Give
succinct
summary
of the
data
sources**

**Specify
criteria
used to
select
studies**

**Describe
guidelines
used for
abstracting
& assessing
data
quality**

**State main
results of
review &
methods
used to
obtain
them**

**State conclusions & potential applications of
the results**

Example of Indicative Abstracts

Objective —To review the literature relating to the effectiveness of education strategies designed to change teacher performance & learning outcomes.

Data Sources—We searched ERIC, NTIS, the Research & Development Resource Base in Education, & other relevant data sources from 2001 to 2022, using teacher education & related terms as keywords. We searched e-journals & the bibliographies of other review articles & called on the opinions of renowned experts.

Informative Abstracts

**State briefly the
content of the paper**

**Follow the sequence of
the article: Intro, Method,
Results, Discussion,
Conclusions, Implications**

**Include the experimental
approach, & independent
& dependent variables**

**Represent each section of
the paper by at least one
sentence in the abstract**

Example of Informative Abstracts

Purpose: The paper presents an evidence-based ...

Design/methodology/approach: A longitudinal ...

Findings: The findings demonstrate

Research implications: The innovative

Social Implications: The applicability

Practical implications: Careful design ..

Originality/value: The framework & the

Limitations: The ...
