About A to Z listings

The purpose an A to Z is to list any required items on a single page, alphabetically. This is done by inserting a web control into your editable area and applying various settings.

The web control is then set to list anything that adopts certain properties.

The example shown in this guide will list **only pages** within nottingham.ac.uk/**sport** that have been set to **show in the A to Z**.

Add an A to Z listing to your page

In edit mode of your page, right click where you would like the listing to go.

1. Select Insert Webcontrol > Listing Controls > A-Z Listing

E			
■ Paste (Ctrl+V)	Listing Controls		A-Z Listing
🔗 Insert Hyperlink	Localisation		Generic List
Insert Image	Membership / Authentication		Recent Forums Topic List
◄ Insert Webcontrol	Multimedia	•	Rss Feed Reader
Edit Template	Navigation		Rss Feed Writer
Delete Template	Search		Syndication Links
Template information		_	Taxonomy List Search

2. Apply the following settings:

Setting	Description			
Enable Title	Unchecked			
Render Mode	Unordered list			
Sub-Item Heading	H2			
No Results Text	There are no results to display.			
Enable Lightbox	Unchecked			
Enable A to Z Bar	Checked			
Initial A-Z Letter	A			
Show Current Letter	Checked			
Enable Animation	Unchecked			
Show '0 to 9' Entry	Checked			
Theme	None			
ID	siteAZ			
Enable Description	Unchecked			
Enable URL	Unchecked			
Enable Release Date	Unchecked			
Icon Display	None			
Items Per Page	50 (change this as necessary)			
Maximum Items	0			
Pager Position	Bottom			
Enable Dynamic Folder Auto Filtering	Unchecked			
	Data filters can be applied to ensure that the correct items are listed. Some examples are:			
Data Filters	Column Property_Path Property_IncludeInAtoZ Property_CT_ID	Type StartsWith EqualTo EqualTo	Value /sport 1 0 (pages only)	

Save and preview to check that your listing is working correctly. If you are happy submit and approve your page.
