

# Consultancy and knowledge transfer

The school actively engages in research, capacity development and knowledge transfer activities with partner institutions across the world. We offer bespoke short

courses, workshops, study days and consultancy to national and international clients.

## International partnerships

The school has a large and diverse community of students and staff from all over the world. We welcome international students and frequently host visiting international research fellows.

Our global network of partner institutions includes the Universitas 21 group and the Erasmus+ exchange programme. The school is a key partner in The University of Nottingham's China-Health Initiative.

All academic programmes in the school address key global health issues and all undergraduate students have the opportunity to spend time overseas during an elective placement.

# Welcome to the School of Health Sciences

The University of Nottingham, described by *The Times and Sunday Times University Guide 2016* as 'the nearest Britain has to a truly global university', is placed 70th in the world and in the top 1% of universities internationally by the latest (2015) QS World University Rankings.

The School of Health Sciences provides healthcare education that inspires students to make an enlightened and valued contribution to society, and conducts research that enable individuals and communities to transform their health and wellbeing.

We achieve this through working in partnership with our students, health service users and their representative agencies, partner trusts, and funding agencies.

The school has three divisions consisting of nursing, midwifery, and physiotherapy and rehabilitation sciences. Across all three of our divisions we have impressive employability rates, with our healthcare students finding work in the UK and abroad.

We also provide a portfolio of flagship postgraduate courses, research training and short courses to equip healthcare professionals from the UK and overseas to advance their careers in the health sciences.

In the UK's Research Excellence Framework (2014), 86% of our submission was rated 'internationally excellent' or 'world-leading'. We have six research groups within the school working in line with the University's Global Research Themes. We also work collaboratively with colleagues from other schools, institutions and partners from the public, private and voluntary sectors.

I hope you find this leaflet useful. Please don't hesitate to contact us for further information.

Professor Joanne Lymn  
Head of School  
School of Health Sciences

## Top 1%

of universities internationally  
(QS World University Rankings 2015)

## 5th

in the UK for research power in  
our unit of assessment (REF 2014)

## Education

The school provides a diverse range of postgraduate taught courses designed to fit flexibly around people's careers, meet the demands of modern healthcare and help students achieve their career ambitions.

We offer excellent opportunities to study for PG Cert, PG Dip, MSc and MA degrees. For a full list of courses please visit [www.nottingham.ac.uk/go/nmp/pgt](http://www.nottingham.ac.uk/go/nmp/pgt)

We also provide professional development courses including an online BSc (Hons) top-up degree which allows students

to build on their existing healthcare qualification and gain a UK degree. These courses are offered full-time and part-time. Find out more by visiting [www.nottingham.ac.uk/healthsciences/cpd](http://www.nottingham.ac.uk/healthsciences/cpd)

Additionally, the school delivers undergraduate courses in nursing, midwifery, physiotherapy, and sport rehabilitation and exercise science. Full details on these courses can be found online at [www.nottingham.ac.uk/ugstudy](http://www.nottingham.ac.uk/ugstudy)

## Research

The School of Health Sciences has a vibrant, multidisciplinary and international research community. Our academics and research students are making major contributions to the advancement of healthcare in many areas.

Our expert research supervisors are members of the following dedicated research groups:

- Digital Innovations in Healthcare and Education (DICE) Research Group
- Maternal Health and Wellbeing Research Group
- Mental Health Research Group
- Nottingham Centre for the Advancement of Research into Supportive, Palliative and End of Life Care (NCARE)
- Rehabilitation Research Group
- Skin Integrity Research Group

Education and research in the school is also supported by a nationally and internationally recognised Centre for Evidence Based Healthcare.

The research possibilities in the school are extensive and you can identify a project supervisor whose expertise matches your own research interests by seeing our 'find a supervisor' webpage: [www.nottingham.ac.uk/healthsciences/find-a-supervisor](http://www.nottingham.ac.uk/healthsciences/find-a-supervisor)

To discover more about the research work we do, please visit [www.nottingham.ac.uk/healthsciences/research](http://www.nottingham.ac.uk/healthsciences/research)
