Third symposium on primary breast cancer in older women

Theme: Personalising the management of primary breast cancer in older women

Friday 6 March 2015

East Midlands Conference Centre
University Park, Nottingham NG7 2RJ, UK

www.nottingham.ac.uk/medicine/breastmeetings

Under the auspices of

SIOG
INTERNATIONAL SOCIETY
OF GERIATRIC ONCOLOGY

Do you want to:

- develop an in-depth understanding around biology and treatment options?
- explore the specific physical and psychosocial needs and consideration including patients' perspective?
- gain insight into the development of a holistic and multidisciplinary management approach and the importance of supporting research?

Programme

Session 1: Biology and clinical relevance

- Biological differences in the older population
- Differing biology and clinical relevance
- Decision of systemic treatment for use in an adjuvant setting

Session 2: Local therapies

- The influence of frailty, co-morbidity and dementia on surgical treatments
- How can TARGIT intra-operative radiotherapy help older patients with breast cancer?

Session 3: The patient's perspective

- Listening to the patient — interview of a few patients
- Psychosocial and quality of life aspects
- Patient-related factors associated with treatment and outcome

Session 4: Challenges and future directions

- The role of the geriatrician
- Specific trial methodology and endpoints

Poster presentations

Accredited by the Royal College of Surgeons of England for up to five CPD points/hours
