⁴ MS severely damaged and heavily stained. In its present condition, even under ultra-violet light, it is impossible to tell whose will it is. Also, the repair of the MS in the 1950s in the form of gauze has decreased legibility. However, the MS appears to have been far more legible to W.H. Stevenson who was able to discern the text more clearly than is the case now. The text within {...} brackets has been calendared from the Latin text given in *RBN* ii, 88-95.

⁵ At this point Stevenson was unable to discern further text but calculated that there were 60 illegible lines. However, a certain amount of text can be read and it is given here.
