

What do you have to do to make an existing list visible to students?

- Click through and login to the [reading list system](#). Use your current university username/password.

- Find your list using either the **module code** or **keywords** from the name.
- **If no changes are required** – from within the list, simply click **edit list (classic)** under the Edit menu

You can then select **Publish**.

- If you need to edit your list, or set up a new one, more guidance on this can be found [online](#). We also run [regular training sessions](#).
