

Searching the literature: bibliographic databases

Subject databases

Search collections of articles by subject. The table below lists databases that are frequently used for systematic review searching across different subjects. Researchers at UoN can access these databases through our discovery tool [NUsearch](#) (go to 'Find databases' at the top of the NUsearch homepage).

Subject areas	Suggested databases
Medicine, Health Sciences	MEDLINE; PubMed; EMBASE; CINAHL
Psychology, Education, Human Development and other Social Sciences	PsycINFO (for Psychology and Education topics); ASSIA Applied Social Sciences Index and Abstracts; ERIC (Education Resources Information Center) (for Education topics)
Agriculture, Food and Nutrition	CAB Abstracts (Ovid); BIOSIS Citation Index (via Web of Science database); BIOSIS Previews (via Web of Science database); Food Science and Technology Abstracts (SilverPlatter)
Reproductive Health and Women	POPLINE (Note: this open resource will be retired on 1 September 2019 – click here for details)
Organizational Development, Economics and Policy	EconLit (ProQuest); ABI/INFORM Global (ProQuest)
