Introduction

The contents of this admissions policy statement are neither an exhaustive nor an exclusive list of issues relating to the A100, A108, A10L and A18L admissions process. The policy is reviewed regularly, updated and subject to change.

It is important that the process of student admission onto the A100, A108, A10L and A18L undergraduate medicine courses is free from unlawful discrimination of any kind.

The following guidelines are consistent with The University of Nottingham Admissions Policy, found here:

View University of Nottingham Admissions Policy

The policy is also subject to statutory requirements governing the professional requirements of the professional accrediting body the General Medical Council (GMC)

Fair Admissions

We believe in ensuring our processes are free from unfair discrimination of any kind. The Directors of Admissions (Nottingham and Lincoln) are responsible for admission to the courses A100, A108 and A10L, A18L respectively. The Vice Dean, Clinical Affairs, oversees admissions processes for all undergraduate courses in the School of Medicine.

The following play no part in the admissions process:

- Age; age is not a barrier to entry at any stage although applicants should consider the length of the course and their expected length of health sector service upon graduation (including postgraduate training)
- Being from a medical background
- Being related to, or an acquaintance of, a member of the School of Medicine or the University
- Country of origin except for:

  A100/A10L applicants - for fee paying purposes, the UK Council for International Education (UKCISA) will advise.

  The A108 and A18L courses are open to applicants who are UK citizens, classed as a home student for fees purposes and living in a neighbourhood in the UK that is less advantaged in terms of income, education and other factors. Applicants from other countries may be eligible if they have indefinite leave to remain in the UK or refugee status at the point of making an application for this course.
- Disability - Subject to Occupational Health clearance to ensure applicants are fit to train and that appropriate support is available throughout the course as outlined in GMC guidance Welcomed and Valued (2019)

- Gender reassignment
- Marriage and civil partnership
- Pregnancy and maternity
- Race or ethnicity
- Religion or belief
- Sex
- Sexual orientation
- Social background or class or school

Maintaining records

Keeping Data
General statistical information is collated each year by the Education Manager, School of Medicine (SOM), overseen by the Vice Dean, Clinical Affairs. Anonymised data is used for analysis and planning purposes by the SOM Admissions Team. Examples of data collated include unsuccessful and successful applicants, gender ratios and age of applicants. The University Planning Unit will use applicant statistics in order to monitor and report on its widening participation objectives.

Records relating to applications for the medicine courses will be kept for one year after the year of application. All interview materials remain confidential to the School of Medicine Education Centre; this information is not released to students as it could compromise the integrity of the structured MMI interview programme. Individual feedback is not provided to applicants.

Policy development and committees

Details
The Admissions policy is defined and reviewed at a local level by the School of Medicine Admissions Committee. The Committee reports to the Undergraduate Medicine Board. Committee membership and purpose is defined in the Admissions Committee Terms of Reference.
Additional Guidance

Fitness to Practise, Criminal Convictions and Disability

Identifying Fitness to Practise Issues

By awarding a medical degree, the University is confirming that the graduate is fit to practise to the high standards laid down by the General Medical Council (GMC) in its guidance Outcomes for Graduates (2018), Promoting Excellence (2016) and Good Medical Practice (2013). It is therefore important that those applicants who may have fitness to practise issues, criminal or health related, disclose this information confidentially to the Director of Admissions (Nottingham or Lincoln) as soon as possible. The UCAS application is screened during selection for declarations of previous criminal convictions and Fitness to Practice issues.

Criminal convictions and professional misconduct

Where criminal convictions are revealed by a declaration on the UCAS application form, or we are notified of professional misconduct at any point during the selection process or from a disclosure by the Disclosure and Barring Service (DBS), any offer will be subject to review by the Fitness to Practice and Professionalism Leads in the School of Medicine.

Applicants will also be expected to comply with University of Nottingham regulations and policies and any significant issues identified during the selection process for Medicine will be reviewed through the processes outlined in the University of Nottingham Quality Manual.

If concerns regarding professional misconduct are identified before an offer is made to an applicant, advice will be sought from the School of Medicine Leads for Fitness to Practice and Professionalism or suitable deputies. The decision about whether to make an offer to an applicant in the light of concerns being raised will be discussed with the Dean of Medical Education, or a suitable deputy. If the offence or conduct issue is not deemed to compromise Fitness to Practise, it may be decided to allow admission to the Medicine course. Where a case is more serious, the application is likely to be unsuccessful.

If concerns regarding professional misconduct are identified after an offer to study Medicine has been accepted by an applicant, a “request for intervention” form, will be raised outlining the concerns. The form will be reviewed by the Fitness to Practice and Professionalism Leads in the School of Medicine or suitable deputies. For more serious issues, where an offer holder has been deemed to potentially reach the threshold of fitness to practice, procedures in keeping with the Faculty of Medicine and Health Sciences Fitness to Practise procedures will be followed. Depending on the nature of the concern being reported, and the outcome of any relevant investigation, one of the following outcomes may occur.
1. The offer holder will be permitted to commence the medical course without a warning or sanction (subject to achieving all other conditions of the offer of study).

2. The offer holder will be permitted to commence the medical course having been issued with a warning or sanction (subject to achieving all other conditions of the offer of study).

3. The offer holder will have their offer withdrawn and will not be permitted to commence on the medical course.

**Occupational Health Clearance**

All offers are subject to satisfactory occupational health clearance. Applicants who accept our offer as their firm choice will be asked to complete and return the relevant paperwork by the 31st July.

It is the responsibility of the Medical School to ensure that students accepted on the course are able to complete the training and achieve the competencies required by the General Medical Council (GMC) for full registration after the first year of training. The Medical School must consult the GMC if there is doubt and if it proposes a modification of experience to achieve the competencies.

All checks must be completed satisfactorily in order for an applicant to register as a student on this course.

**Disability, special needs or medical conditions**

Applicants with a disability, special needs or medical conditions are encouraged to notify the relevant Director of Admissions so that appropriate adjustments can be made, for example, during interview. Firm and insurance offer holders may be asked to provide additional information relating to a disability, special needs requirements or chronic medical condition indicated on an application, which will be considered by the Director of Admissions and the Director of Wellbeing and the Disability Liaison Officer (SOM, undergraduates). All firm offer holders will be assessed by The University of Nottingham Occupational Health provider to ensure applicants are fit to train and that appropriate support is available throughout the course as outlined in *GMC guidance Welcomed and Valued* (2019).

The Medical School must ensure that all students accepted on to the course are capable of completing the training and achieving the competencies required by the General Medical Council (GMC) for full registration after the first year of training (GMC Outcomes for provisionally registered doctors with a licence to practice, 2015).

A clear plan to enable a disabled student to achieve competency must be agreed before the student enters the course. Not all disabilities limit the experience of doctors in training in this way, but applicants should disclose any disability in their UCAS application and be
prepared to release their medical details to allow the University’s Disability Services team to assess the situation.

Failure to disclose a disability that might prevent an applicant from carrying out their required duties could put at risk the applicant’s fitness to practise and might jeopardise their place on the medicine course.

Voluntary and Work Experience
All applicants are expected to have spoken to a doctor or doctors to ensure they are making an informed choice about a career in medicine. Applicants should also have ongoing voluntary work experience in a care related setting in their 'home' country or to have ongoing volunteering experience helping disadvantaged groups or paid employment in a job working with the general public. It is highly unlikely that students without the appropriate experience will be offered a place on the A100, A10L, A108 and A18L courses.

Applicants are expected to provide independent evidence of the work or volunteering experiences mentioned in their personal statements. The evidence must be uploaded onto the MyNottingham portal prior to interview.

Course-specific information
Admissions process

Applications are assessed to ensure applicants fulfil the minimum course entry requirements.
Achieved GCSE grades (or equivalents) and UCAT scores are assessed and scored. Applicants are ranked and the top scoring applicants are invited to interview. Interviews will be held from December to early March.
The scoring systems are updated and made available to applicants each year on our website:

View A100 and A10L Selection Process
View A108 and A18L Selection Process

Academic criteria

Academic entry requirements for standard qualifications (A-level, IB, SQA, Welsh Bac, GCSEs) can be found in the undergraduate course finder:

View undergraduate Medicine courses
Other qualifications, including international qualifications, are considered on an individual basis.

We do not accept applicants who, for whatever reason, failed to complete the study of a Medicine degree at another institution.

From 2020 entry, we will consider resits of no more than 2 A-levels under the following conditions:
- Applicants have completed A-levels in the last 12 months
- Obtained at least ABB at first sit with at least an A in Biology/Human Biology or Chemistry
- Applicants are predicted and must achieve AAA after taking resits

We do not accept A levels in the following subjects:
- Citizenship studies
- Critical thinking
- General studies
- Global perspectives.

Due to overlapping content, we are unable to consider the following subject combination:
- Biology and Human Biology (Biology A and Biology B)

**Graduate students applying for the five-year BMBS programme**

Applicants at University studying subjects other than Medicine can apply for Medicine at University of Nottingham if they are in their final year and due to graduate. They must be predicted/achieved at least an upper second class honours degree (or equivalent) in any subject.

Degrees must be completed in the natural length intended for the qualification (generally, 3 years for Bachelors, and 4 years for integrated Masters).

They must also meet the other academic entry requirements (A-level or equivalents) specified in the course finder:

View undergraduate Medicine courses

From 2020 entry, graduates applying for the five-year courses (A100/A10L) do not require all three A-levels to be taken in one sitting.
If applicants are unsure if their degree is acceptable, or what A-levels are required, they are advised to contact the enquires team who will be happy to advise.

Applicants who started University studies but did not complete their degree, or who withdrew from their studies, can apply for Medicine if they meet all the entry requirements (GCSE, A-level or equivalent) specified in the course finder:

View undergraduate Medicine courses

We also consider non-graduate mature applicants. There is no fixed upper age limit, but we will consider the length of the course and the expected length of service after you qualify. Mature applicants must also have evidence of academic study within three years of application.

Additional Criteria

Minimum age requirement

We accept students who are 17 years old or above onto the course. If we wish to make an offer to a student who is younger than 18 we will obtain permission from parents before making that offer.

We do not consider applications from students who would be in their 16th year on the 1st September of the year they start their course.

UCAT

All applicants are required to take the Universities Clinical Aptitude Test (UCAT) in the current year cycle for application. Applicants with a Situational Judgement Test (SJT) score in band 4 will not be considered, and will not be invited to interview.

We use a scoring system to rank applicants and invite the top scoring applicants for interview. There is no set cut-off score for the UCAT. For more details on this:

View A100 and A10L Selection Process

View A108 and A18L Selection Process

For further information on the UCAT, including practice tests and details of their bursary scheme:

View UCAT website

Use of the Personal Statement

From 2020, we will no longer use the personal statement as a weighted component of our selection criteria. Should we need to differentiate between applicants that have identical

Admissions Policy A100, A108, A10L and A18L | 7
scores at interview when making offers, the personal statement may be used alongside the UCAT scores (including the SJT) to do so.

**Interviews**

All applicants who are selected for interview must attend in order to be considered. No offers for Medicine are made without the applicant first attending an interview within the current cycle. This does not mean that we interview all applicants. We do not consider previous interview performance for those applicants who have been interviewed in previous cycles, unless they were flagged as having demonstrated a “serious concern” at the time.

The purpose of the interview is to provide the applicant with an opportunity to demonstrate evidence of skills and attributes that are appropriate to a career in medicine and to display insight into a range of topics related to a career in medicine.

Interviewees also receive a tour of the Medical School at Nottingham or the University of Lincoln campus depending on the course applied for, and have an opportunity to meet current students. Photo identification will be required at interview.

**At the interview**

Applicants move around eight Multiple Mini Interview (MMI) stations, each taking six minutes (one minute for reading instructions and five minutes for completing the task). The first station of the cycle will begin with a two minute “ice-breaker” which will not contribute to the overall score.

Each interview station is designed to assess one or more specific attribute that we believe makes a good doctor and upholds GMC and NHS values. Interviews are conducted in accordance with the University's Equality and Diversity Policy. Every interviewer has undertaken bespoke MMI assessor training, as well as equality, diversity and unconscious bias training.

A member of the Medical Admissions Committee, usually the Director for Admissions for that site will lead the MMI held on each day. At least one Admissions Committee member will provide support and quality assurance.

**Extra time in assessments**

Sufficient time is built into our MMI stations, such that additional extra time is not required.

**After the interview**

Applicant performance at MMI is scored by the assessors and ranked by the SOM Admissions Team. Those applicants with the strongest overall performance receive
offers. We aim to make offers as soon as possible, but to ensure fairness, applicants may not receive a decision until all the interviews have been completed. The UCAT score, including the SJT band, is our primary differentiator for distinguishing between applicants with identical MMI scores. We may also refer to the personal statement in these circumstances.

**Aspirational offers**

Due to the competitive nature of our course, we only consider applicants who are predicted to achieve (or have already achieved) our entry requirements in full.

**Alternative offers**

Applicants who did not score highly enough at interview may be considered for an alternative medicine or other courses. In such cases, applicants receive an email providing details of the alternative options. Courses that may be offered as alternatives (but are not limited to):

- Medicine A10L, A100
- Medical Physiology and Therapeutics
- Cancer studies

**Deferred applications**

Deferred applications (those made in 2019/20 for 2021 entry) are accepted.

In fairness to the following cycle of applicants, we only make a limited number of deferred offers. Applicants who did not apply for deferred entry initially, but who subsequently wish to defer after receiving an offer, must request deferral by 1st May. Requests received after the deadline are only considered in exceptional circumstances. We reserve the right to decline deferral requests (for example, if we have an exceptionally high number of deferred offer holders).

**Transfers**

Requests for transfers onto Nottingham or Lincoln Medical School medicine courses are not considered from any source.

**General Information**

**Admissions team**

All applications are assessed by a central University of Nottingham Admissions Service, in close co-operation with the School of Medicine Admissions team.

**Admissions process**
We assess applicants on the basis of their application only; we do not take into account any additional information received from an applicant or institution, unless we have requested it.

Applications received by the 15 October deadline set by UCAS are guaranteed equal consideration.

We aim to release some, but not all offers to applicants in early February, when most of our interviews have been held. In fairness to all applicants with later interview dates, some offers will be held back until March when all interviews are completed.

We do not discriminate against applicants on the grounds of age, disability, gender reassignment, marriage or civil partnerships, pregnancy and maternity, race, religion or belief, sex, or sexual orientation.

To assess an application, we require the following information:

- a full academic history from age 16 onwards, including details of any retakes or uncompleted qualifications;
- predicted grades for any qualifications the applicant is currently taking. These must be provided by the applicant’s school or referee, and must include an overall grade (if applicable), and, where a particular subject is specified in the entry requirements, the achieved or predicted grades for that subject, and any related or major subjects being studied;
- in cases where predicted grades are not available or a student has not provided information on their past completed qualifications, an academic transcript showing the results of the previous two years’ courses or examinations.

Correspondence with applicants
All correspondence relating to an applicant’s status is sent by email. We monitor the number of offers we make and may hold some applications until later in the cycle. For applications submitted by 15 October, the final deadline by which applicants receive a decision is 2 May. Most decisions are released well before this date.

Reference criteria
References should be provided by a personal tutor from the applicant’s school or college. Where this is not possible, a non-academic reference should confirm the applicant’s relevant experience and indicate their potential for degree-level study.

The reference is considered alongside the personal statement, taking into account the following:

- predictions of examination results (including, if necessary, an explanation of any non-standard qualifications);
• an overall assessment of the applicant, in particular the suitability and academic potential of the applicant to study at degree level;

• discussion of earlier exam results, especially those influenced by personal or medical circumstances (and therefore a poor guide to ability);

• discussion of the applicant’s intellectual curiosity, interests and suitability for the subject.

International applicants

International applicants are subject to the criteria detailed on our international web page:

View international applicant website

ENGLISH LANGUAGE REQUIREMENTS FOR NON-UK STUDENTS

Medical students need to be fluent in English, both to understand the course and communicate with patients.

International applicants

If English is not your first language, we only accept one of the following:

• IELTS 7.5 (no less than 7.0 in any element)

• Pearson Test of English (Academic) 73 (minimum 67)

• Cambridge Proficiency/Advanced test (from January 2015) 191 with no element below 185

• International Baccalaureate diploma: either GCSE English language grade B(6) or IB standard English language grade 5.

Notes:

• Applicants who are studying their curriculum (i.e. all subjects) in the English medium are required to have GCSE English (first) language grade B (6). IELTS will compensate for a grade lower.

• Applicants who are studying their curriculum in their home language can take IGCSE English however they must have IELTS as well

Former international and EU students living in the UK

For 2020 entry, if your home country is not the UK but you are now living in the UK (with indefinite leave to remain) having moved here after 1 September 2016 from a country where you were not studying the full curriculum (ie all subjects) in the English language:
If you have NOT achieved level 6 (Grade B) GCSE English language, we will accept one of the following:

- IELTS 7.5 (no less than 7.0 in any element)
- Pearson Test of English (Academic) 73 (minimum 67)
- Cambridge Proficiency/Advanced test (from January 2015) 191 with no element below 185
- International Baccalaureate diploma: IB standard English language grade 5.

English language requirements for each course can be found in the undergraduate course finder:

View undergraduate Medicine courses

Contextual information

As part of our commitment to the UK national agenda on widening participation, we consider the context in which grades have been achieved and may make contextual offers. Contextual offers are usually one grade lower than the typical offer. If you are successful at interview, you may then be made an offer of AAB with at least one A in either Biology or Chemistry. However, this offer will be conditional on you accepting the University of Nottingham as your firm choice.

Applicants may receive a contextual offer for the following reasons:

- students who have spent more than 3 months in care
- students who have attended a state school and meet any one of the criteria below;
  - have attended specified sustained widening participation schemes
  - live in a low participation neighbourhoods or disadvantaged area
  - are refugees

Additional information

The University only guarantees places to applicants who meet the exact terms of their offer; however, applicants who narrowly miss the terms of their offer may still be considered as ‘near-miss’ candidates and may be considered if not all allocated places are filled in August, at the time of publication of A level results. The number of places potentially available to near miss candidates varies from year to year depending on the number of firm offer holders who achieve their grades.
All applications from such candidates are reviewed in August after publication of A-level results. Any candidates in this position will be notified of all decision via UCAS and not directly from the Medical School.

**Contacts for enquiries**

Applicants’ who have any questions, will be directed to the Enquiries team:

Make an enquiry
