

Workshop 30 – Advertising and Sponsorship Opportunities

UKERNA has organised well-attended and highly professional conferences, workshops and seminars for many years. These events attract computer network professionals and managers from the research, higher and further education communities in the UK, **who between them spend £220 million per year on Networking**. The annual Workshop conferences are usually attended by about 300-350 delegates. The Conference schedule covers three days and will have several parallel sessions. Sponsors will be acknowledged in the Conference Guide and on the Workshop 30 website, as well as at the event itself.

All enquiries should be directed to:-
