## Post COVID-19: Is digital the future of primary care?

19 March 2021 - 1230-1400 hrs

Primary healthcare delivery is being transformed through digital adoption of new innovations to address the challenges in delivering care differently, maintaining access and introducing new ways of working. COVID-19 has rapidly accelerated this process.

This webinar aims to discuss where we are now and where we want to be in delivering safe and effective healthcare. It will be of interest to anyone who wants to understand how data and technology can help to achieve this.

To book your free place, go to: <https://www.eventbrite.co.uk/e/digitally-enhanced-primary-healthcare-in-the-new-reality-tickets-138968457397>
