Sometimes you get itchy and your skin gets sore. Your mummy or daddy may use cream to help make your skin better but sometimes this doesn’t work.

Doctors, nurses and researchers are trying to find ways to help with this. We are talking to families to find out what would help them the most. We would like to talk to mummies and daddies and older children too.

You can help them by telling your mummy or daddy how you feel.

You can chat more to your mummy or daddy or the researcher about this.
