

# Supporting return to work after traumatic brain injury study.

We want to find out what are the important outcomes for people who were in work or full time education before their traumatic brain injury if early specialist help was available.

**Have you had experience of traumatic brain injury?  
Are you an employer who knows about brain injury?**

## We need people who:

- Have experienced a traumatic brain injury
- Employers with some knowledge of traumatic brain injury.

## What will you be asked to do?

### People with brain injury

- Come to the University of Nottingham and take part in a Focus group lasting no more than 2 hours and/or
- Tell us what you think the main aim of early specialist rehabilitation should be for people who were in work or education before their injury.

### Employers

- Contact us to discuss how we can best obtain your views on what the main aims of rehabilitation should be when an employee sustains a traumatic brain injury.

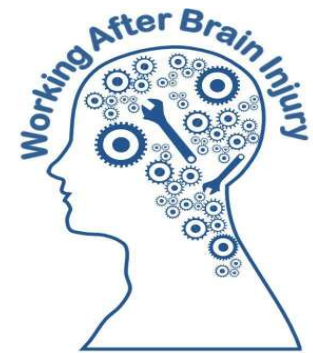

**Travel expenses will be paid.**

**If you are interested, please contact :**

**Dr Julie Phillips, B114, Division of Rehab & Ageing, School of Medicine, University of Nottingham, NG7 2UH.**
