Accelerating recovery from stroke: navigating the translational research pipeline

*Seminar hosted by the Division of Rehabilitation & Ageing
School of Medicine, University of Nottingham*

Tuesday 12 August 10–12:30 – Room B128 Queens Medical Centre

“A common language or lexicon is key to better communication and flow of ideas between clinicians and scientists and to the transmission of information in any pipeline” Cumberland Consensus Working Group, 2009

- 10:00 Introduction: Importance of ‘boundary spanning’
Dr Rebecca Fisher
- 10:15 Neuroimaging and neuroplasticity: predictions for recovery after stroke
Dr Nick Ward (Institute of Neurology, UCL)
- 11:00 Harnessing neural plasticity to treat visual disorders – applications to stroke
Dr Ben Webb (School of Psychology)
- 11:20 Combined drug and stroke rehabilitation therapy – lessons from a pilot RCT: STEMS3
Dr Niki Sprigg (Division of Clinical Neuroscience)
- 11:40 Beyond the randomised controlled trial: impact on stroke services
Dr Rebecca Fisher (Division of Rehabilitation & Ageing)
- 12:00 Open discussion – challenges and benefits of cross pipeline working
