for employment

An exciting programme of internationally renowned research in collaboration with academic and industrial partners

Overview

This course is for BSc graduates in biological sciences (or related subjects) to allow you to specialise in nutrition. It is not appropriate for graduates of a BSc nutrition programme.

This course provides an in-depth education in human nutrition covering the underlying principles and evidence base, defining concepts, theories and methods, and the current knowledge and development of the subject, within a research-led environment.

This exciting programme is managed by the School of Biosciences' Division of Nutritional Sciences – one of the largest providers of undergraduate and postgraduate training in nutrition and related subjects in the UK. The division is also engaged in internationally renowned research in collaboration with academic and industrial partners.

Content

You will further develop your interest within the field of nutritional sciences while completing a student-led primary research project.

This course is accredited by the Association for Nutrition. Successful graduates can apply directly for entry to the UK Register of Nutritionists as Associate Members and are entitled to use the ANutr qualification.

Structure

This one year full-time masters course (or two years part-time) consists of two semesters of taught modules (120 credits) and a research project and dissertation (60 credits).

Modules

Compulsory modules:

- Fundamentals of Nutrition
- Molecular Nutrition
- Nutrition and Metabolism
- Public Health Nutrition
- Research Skills in Nutrition
- Systematic Review in Nutrition

Further information is available at:
nottingham.ac.uk/pgstudy/biosciences

Entry requirements

You will normally be expected to hold an honours degree at 2:2 level or above (or its international equivalent) in a biological science subject (excluding nutrition or closely related degrees). Applicants whose first language is not English must also achieve IELTS 6.5 (with no less than 6.0 in any element). Test results should be no more than two years old.
