Academic dress: A brief history

Academic dress has a rich history, evolving from its practical origins to becoming a symbol of achievement and distinction. In the past, hoods were used to cover the head and varied in lining materials based on the season.

Today, the colours and styles of hoods and gowns serve as a visual representation of different levels and subject areas of awards. The colours and styles vary depending on the institution. Since its establishment in 1948, Nottingham has used light blue as its degree colour.

Academic dress

Gowns

Gowns for first and masters degrees are black.

Gowns for doctors are claret, faced to a depth of 3" with light blue silk.

Gowns for higher doctors are scarlet, faced to a depth of 3" with light blue silk.

Hoods

Those receiving a certificate students wear a hood in the Belfast shape.

Those receiving a diploma students wear a hood in the Edinburgh shape.

Those receiving a degree at all levels wear a hood in the Cambridge shape.

All graduate hoods are bound at the edge with a ribbon of the colour appropriate to the nominal faculty. For higher first and higher masters degrees, the entire hood – including the cape – is bound with ribbon.
