## Expert academics

who are pushing the boundaries of the subject

Our course are shaped by our industrial links with companies such as **Rolls-Royce, Airbus and Bombardier**

## Get hands-on experience

with a year out in industry

## Build key, transferable skills

sought after by top employers

## Study abroad opportunities

for a full year

## Get involved

and join our student society AeroSoc

## Top 12 in UK

for mechanical engineering  
*The Guardian University Guide, 2019.*

## Guidance and advice

from your personal tutor, peer mentor and dissertation supervisor

Our MEng degrees cover all core aerospace requirements needed to become **a Chartered Engineer**

# Aerospace engineering at Nottingham

Our teaching is underpinned by world-leading research, with £75m of funding awarded to our Institute for Aerospace Technology from industry giants such as Airbus, Rolls-Royce and BAE Systems.

## Careers

There are wide-ranging employment opportunities for aerospace engineers across a range of job functions, from technical to managerial.

The University's engineering graduates are highly employable and we look forward to seeing our aerospace engineering students graduate into positions of innovation, responsibility and leadership as our course matures.

Our commitment to research and teaching excellence combined with strong links to industry, enable our graduates to be employed by global companies. Many of them start their careers in an engineering role, but our courses offer careers beyond your specialism.

Equally, you may decide to progress onto postgraduate study and either pursue an MSc or focus on research and study for a PhD.

## At a glance

- Use state-of-the-art aerospace equipment including wind tunnels and a flight simulator, as well as access to flying lessons at a local airport
- Be taught by academics who conduct high-quality aerospace research

## Developing your potential

At Nottingham, we like to see individuals succeed to the best of their capability. We provide a stimulating learning environment that both challenges and supports you throughout your course, and our personal tutor system ensures you always have close contact with an academic staff member.

## High-quality research

According to the Research Excellence Framework (REF 2014), in the Faculty of Engineering over 98% of research is of international quality, while 85% is 'world-leading' or 'internationally excellent'.

# Our courses

Degree title	UCAS code	Duration	A levels	IB
<b>Single honours</b>				
BEng Aerospace Engineering	H402	3 years	AAA-AAB	36-34
BEng Aerospace Engineering including an Industrial Year	H40A	4 years	AAA-AAB	36-34
MEng Aerospace Engineering	H400	4 years	A*AA-AAA	38-36
MEng Aerospace Engineering including an Industrial Year	H40B	5 years	A*AA-AAA	38-36

## Required subjects

All courses: A level general studies and critical thinking not accepted as part of the grade offer. Maths is essential – A level grade A or IB Higher Level 6 or Standard Level 7. Physics is a highly preferred subject, however offers are sometimes made to applicants without this.

## Foundation courses

Applicants who are not eligible for direct entry to undergraduate study may be able to apply for the Engineering Foundation Year Programme. Find out more at [nottingham.ac.uk/foundationcourses](http://nottingham.ac.uk/foundationcourses)

## English language requirements

IELTS 6.0 (no less than 5.5 in any element). For details of other English language tests and qualifications we accept, please see [nottingham.ac.uk/go/alternativerequirements](http://nottingham.ac.uk/go/alternativerequirements)

## Academic English preparation

If you require additional support to take your language skills to the required level, you may be able to attend a pre-session course at the Centre for English Language Education, which is accredited by the British Council for the teaching of English in the UK.

Students who successfully complete the pre-session course to the required level can progress onto their chosen degree course without retaking IELTS or equivalent. Find out more at [nottingham.ac.uk/cele](http://nottingham.ac.uk/cele)

# BEng | MEng Aerospace Engineering

Our courses are offered at both BEng and MEng levels with the BEng consisting of three taught years and MEng consisting of four.

## Year one and two

You will follow a common programme of study for the first two years, studying material that provides comprehensive core expertise in aerospace engineering and aircraft technology. A key feature of the first year is the integrating design, make and test project where you use some of the key skills and knowledge from your first year studies to design and build a model-scale glider.

Year two builds on year one with more advanced content in all the key subject areas. The design, make and test project this year focuses on aircraft design and control.

“The most exciting thing about our course so far is the integrated project. We’ve been working in small groups to build a glider that should go the distance we’ve calculated. Tasks like this have allowed me to develop the skills industry are looking for, like the ability to work as a team as well as show leadership. We’ve got really good contacts with personal tutors and our course director too – they’re always there to help us if we need to know anything.”

Emily Terry,  
BEng Aerospace Engineering

## Years three and four

Years three and four provide the opportunity to specialise in certain subject areas and study advanced topics. An individual research project is a key element in final year for all our courses.

## Accreditation

These degrees have been accredited by the Institution of Mechanical Engineers (IMechE) and provide you with some or all of the underpinning knowledge, understanding and skills for eventual registration as an Incorporated (IEng) or Chartered Engineer (CEng).

Accreditation is a mark of assurance that the degree meets the standards set by the Engineering Council in the UK Standard for Professional Engineering Competence (UKSPEC).

We are currently following the defined and recognised processes for becoming accredited by the Royal Aeronautical Society (RAeS) and the Institute of Engineering and Technology (IET) under licence from the UK regulator, the Engineering Council.

## Typical modules

Year one	Year two	Year three	Year four (MEng only)
<p><b>Core</b></p> <ul style="list-style-type: none"> <li>■ Aerospace Aerodynamics</li> <li>■ Aerospace Design and Materials</li> <li>■ Aerospace Electrical and Electronic Engineering</li> <li>■ Aerospace Statics and Dynamics</li> <li>■ Aircraft Design and Performance</li> <li>■ Professional Engineering and Project 1</li> </ul>	<p><b>Core</b></p> <ul style="list-style-type: none"> <li>■ Aerospace Design and Manufacture</li> <li>■ Aerospace Propulsion</li> <li>■ Control of Aerospace Systems</li> <li>■ Airframe and Materials</li> <li>■ Dynamics and Flight Mechanics</li> <li>■ Professional Engineering and Project 2</li> </ul>	<p><b>Core</b></p> <ul style="list-style-type: none"> <li>■ Individual Project (BEng)</li> <li>■ Aerospace Group Design Project (MEng)</li> <li>■ Management, Professional Practice</li> <li>■ Computer Modelling Techniques</li> </ul> <p><b>Plus optional modules:</b></p> <ul style="list-style-type: none"> <li>■ Advanced Aerodynamics</li> <li>■ Advanced Flight Dynamics</li> <li>■ Advanced Propulsion</li> <li>■ Advanced Materials</li> <li>■ Avionic Systems</li> <li>■ Fibre Reinforced Composites Engineering</li> <li>■ Introduction to Space</li> <li>■ Making Metals Perform</li> <li>■ More Electric Aircraft</li> </ul>	<p><b>Core</b></p> <ul style="list-style-type: none"> <li>■ Individual Project</li> <li>■ Aerospace Industry, Management and Technology</li> </ul> <p><b>Plus optional modules:</b></p> <ul style="list-style-type: none"> <li>■ Additive Manufacturing and 3D Printing</li> <li>■ Advanced Dynamics and Vibration</li> <li>■ Computational Fluid Dynamics</li> <li>■ Finite Element Analysis</li> <li>■ Flight Controls for Aircraft and Spacecraft</li> <li>■ Introduction to Turbulence and Turbulent Flows</li> <li>■ Joining Technology</li> <li>■ Satellite Based Positioning</li> <li>■ Spacecraft Systems and Design</li> </ul>

Modules may change, for example due to curriculum developments. The above list is a sample of typical modules that we offer, not a definitive list. The most up-to-date information can be found on our website at [nottingham.ac.uk/ugstudy/aerospace](http://nottingham.ac.uk/ugstudy/aerospace)

# Degrees with a year in industry

**A year in industry is a fantastic opportunity for you to practise and develop your engineering skills, providing valuable professional experience which is key to achieving Chartered Engineer status.**

## Benefits

A year in industry will give a significant boost to both employment and academic prospects. According to research previously conducted by High Fliers Research, more than a third of graduate jobs are being filled by candidates who already have work experience with that employer. Getting a year in industry placement is therefore a great way into the job market after graduation. The skills and maturity that students develop while out on placement have a positive impact on their final degree results, which of course further enhances employability.

## Features

Placements are usually undertaken in the UK, but can be anywhere in the world in companies from major global organisations to smaller consultancies and technology specialists.

“I would definitely recommend a year in industry because it lets you have a taste of what working life is really like.”  
Laura Cruz Garcia,  
MEng Mechanical Engineering, carried out her placement at Rolls-Royce Plc

During a placement, you are classed as an employee of the host company, and will receive a salary. There is a nominal fee for the placement year and you will remain fully registered with the University during this time.

## Support

Our dedicated Industrial Placement Team works closely with the Careers and Employability Service to support you in finding the right placement. Companies also visit the University to recruit students for industrial placements.

The benefits of a year in industry are well recognised, and as such our degrees with an industrial year are very popular. Likewise, securing a year in industry placement is a highly competitive process, and you are responsible for submitting your own applications, which may include attendance at interviews and assessment centres. We therefore expect you to commit additional time over and above your academic studies to this process.

# Engaging study, incredible results

**Engineers are among the busiest students on campus. On average, you will have around 20 contact hours a week in years one and two. Combined with coursework and self-study, you may spend over 40 hours a week on your studies.**

## Course structure

For most modules, the primary method of building your knowledge will be through lectures. Some modules will involve laboratory classes where you work in small groups and seminars. Academics and postgraduate tutors are available for one-to-one support and our personal tutor system will ensure that you always have close contact with an academic staff member.

## How will I be assessed?

All undergraduate degree programmes in the University are modular, which means you undertake modules of study with assessment at the end of each academic year or each semester as appropriate.

Your learning will be assessed in different ways according to the learning objectives.

Most modules will be assessed using a mixture of coursework, exams and project work with the proportion varying depending on the module. In some cases you might be asked to give an assessed presentation.

An important part of learning comes through constructive feedback and you will receive appropriate and comprehensive feedback on all your coursework.

## Key Information Sets

Key Information Sets (KIS) are comparable sets of information about full or part-time undergraduate courses and are designed to meet the information needs of prospective students. All KIS data is published on the Unistats website [unistats.co.uk](http://unistats.co.uk)

# The Institute for Aerospace Technology (IAT)

The University of Nottingham has an illustrious legacy of high impact aerospace research held within our prestigious Institute for Aerospace Technology (IAT), based on our Jubilee Campus.

Working closely with a wide range of aerospace companies including Rolls Royce, Boeing and Airbus, the Institute has a portfolio of projects worth £60m. The UK has the second largest aerospace sector in the world and more people use our work on aerospace than any other university in the UK.

We have over 70 externally funded projects with a team of 50 academics and 400 researchers

The IAT works across these five key themes:

- **Aero Engines and Propulsion** – key technologies related to engines and propulsion systems
- **Aerospace Manufacturing** – innovative methods to manufacture aircraft structures using the latest tools and techniques
- **Aerospace Materials and Structures** – developing new materials and structures to enable more efficient flight
- **Aerospace Operations** – enabling fuel efficient and passenger friendly experiences
- **More Electric Aircraft** – delivering advanced electrical technologies to enable lighter and more controllable aircraft

“Rolls-Royce has enjoyed a long and successful partnership with the University including two university technology centres researching aero-engine transmissions and manufacturing technologies.”  
John Rishton,  
Former CEO of Rolls-Royce Plc

# Outstanding careers support

Our courses have a strong focus on preparing you for professional practice. Modules are designed to meet the standards set by industry.

## 112,000 people

The UK aerospace industry is the second largest in the world, directly employing 112,000 people.

## £26,000

was the average starting salary\*

### Take your degree further

Our courses have a strong focus on preparing you for professional practice: modules are designed to fulfil the requirements of engineering institutions and projects often have direct industrial relevance.

Our degrees are balanced and well-rounded and the majority of our graduates who do not continue in further education progress to professional careers in a wide range of engineering industries or in non-engineering sectors.

### Amplify your potential

Whether you already have a plan or need some inspiration, your Careers and Employability Service is here to help.

Academic excellence and employability go hand in hand at Nottingham. Your course, and the diverse student experiences we offer, will enable you to develop the skills and professional competencies required to thrive in the job market of the future.

We will help you explore your options, so you feel confident making choices about what you want to achieve. Our team will support you as you build your CV, search for jobs, prepare applications, practise your interview technique, and much more.

### Get the Advantage

The career-enhancing Nottingham Advantage Award recognises and rewards your extracurricular activities. With a choice of over 200 modules, you can hone the key skills employers are looking for. From developing your leadership skills and learning a language to public speaking and volunteering, you will leave university with demonstrable experience that sets you apart from other graduates. For further information, visit [nottingham.ac.uk/careers/advantage](http://nottingham.ac.uk/careers/advantage)

“My time at Airbus has been highly exciting and it’s particularly gratifying to actively contribute to real aircraft that will soon be flying around the world. Since starting at Airbus, I’ve realised the main thing I took away from my time at Nottingham was the way I viewed engineering problems and how to solve them. Beyond this, working in industry has opened my eyes to the importance of team work, something ingrained in me from the first year at Nottingham.”

Sam Crawshay-Jones,  
Airbus, MEng Mechanical Engineering

\* Known destinations of full-time home undergraduates who were available for work 2016/17. Salaries are calculated based on the median of those in full-time paid employment within the UK.

How to apply

# How to apply

All applications for full-time undergraduate study at Nottingham, including applications by international students, must be made through UCAS.

You can apply online at [ucas.com](http://ucas.com) and will be notified of decisions through UCAS Track.

## Your personal statement

This is the section of your UCAS form that tells us most about you, and you should make the best use of it. Be as specific and detailed as you can – we would like to see that you are a student who can work hard, be self-motivated and make the best possible use of the opportunities that our courses offer you. We would also like to hear about any skills you have gained through extracurricular activities.

## Minimum entry requirements

Unless otherwise stated in individual course profiles, all UK applicants should have GCSE English grade 4 (C) as a minimum.

## Alternative qualifications

In this brochure you will find our A level and International Baccalaureate entry requirements but we accept a much broader range of qualifications. For more details, visit [nottingham.ac.uk/ugstudy/applying](http://nottingham.ac.uk/ugstudy/applying)

## Flexible admissions policy

In recognition of our applicants' varied experience and educational pathways, we employ a flexible admissions policy. If we judge that your situation has adversely affected your achievement, then we will consider this when

In 2019/20 the Core Bursary will offer up to £2,000 for each year of undergraduate study.\* For more details, see [nottingham.ac.uk/financialsupport](http://nottingham.ac.uk/financialsupport)  
\* To eligible home fee status students.

assessing your academic potential. Some courses may make a slightly lower offer. For more information about this policy, see [nottingham.ac.uk/ugstudy/applying](http://nottingham.ac.uk/ugstudy/applying)

## Mature applicants

We encourage applications from mature students, who are defined as 21 years old and over. You should apply through UCAS. Find out more at [nottingham.ac.uk/mature](http://nottingham.ac.uk/mature)

## International applicants

The University provides a range of information and advice for international applicants. If you are unable to attend an open day, we can meet you in your country at one of our overseas events or arrange an individual visit to the University. For further information please visit [nottingham.ac.uk/international](http://nottingham.ac.uk/international)

## Deferred entry

Applicants who wish to defer their entry by a year will not be at a disadvantage. Please tell us something about your plans for your gap year in your UCAS personal statement.

## Equal opportunities policy

The University aims to create the conditions whereby students and staff are treated solely on the basis of their merits, abilities and potential, regardless of gender, race, colour, nationality, ethnic or national origin, age, socio-economic background, disability, religious or political beliefs, trade union membership, family circumstances, sexual orientation or other irrelevant distinction.

If you wish to declare a disability, please ensure that you have ticked the appropriate box on your UCAS application form. Disclosure of this information will not affect your application.
