Veterinary Continuing Professional Development Courses 2019

25% off selected courses when booked by Thursday 28 February 2019

nottingham.ac.uk/vet/cpd
Welcome to the University of Nottingham CPD Education Centre

Welcome to our 2019 CPD brochure. For returning delegates, may I take the opportunity to say thank you for your continued support, and for those that are new to the Veterinary School’s Centre for CPD, may I extend a very warm welcome. Our 2019 CPD programme offers a wide range of courses to cater for all levels of experience, from the new graduate to the experienced, advanced practitioner. We hope that you will find something that is appealing and of practical use on a day-to-day basis.

In putting together this year’s programme, we have acted upon the comments and requests provided by delegates attending previous courses. We will continue to offer numerous ‘standard’ one-day face-to-face courses, as well as the ever popular practical one-day courses. Both types of course remain very competitively priced. We continue to use the teaching skills, expertise and experience of several internationally renowned external lecturers and for 2019 these include Gareth Arthurs, Jackie Demetriou, Rob Foale, Andrew Parry, Chiara Penzo and Stephen Shaw.

The Veterinary Surgical Training Academy, which runs in collaboration with Veterinary Instrumentation, is now into its third year. The ethos of the academy is about teaching safe surgery and I am very proud that our popular two-day residential Veterinary Basic Surgical Skills (VBSS) course continues to be recognised and supported by the Royal College of Surgeons (England). In addition to the VBSS course, this year we will offering one-day intermediate soft tissue courses covering gastrointestinal tract, urinary tract, wound closure/reconstruction and surgical energy devices. For orthopaedics, we will be offering intermediate courses covering feline orthopaedics and arthrodesis. We will also offer advanced courses in both TPLO and closing wedge TPLO. Discounts will be available for those who have attended the VBSS course prior to attending intermediate level courses.

Many of our courses are offered with a 25% discount for early booking and you may book online via our website at nottingham.ac.uk/vet/cpd. Alternatively, please contact Ruth Readyhoof, CPD Education Centre Manager at veterinary-cpd@nottingham.ac.uk or on 0115 951 6647 to book your places.

I very much look forward to welcoming you to our CPD Education Centre in 2019.

Professor Rob White
BSc (Hons) BVetMed CertVA DSAS (Soft Tissue) DipECVS SFHEA FRCVS
Sub Dean for CPD School of Veterinary Medicine and Science University of Nottingham
Faculty Members

Gareth Arthurs
PGCertMedEd MA VetMB CertVR CertSAS DSAS (Orth) FHEA FRCVS
RCVS recognised specialist in small animal surgery (orthopaedics)

Gareth is experienced in all aspects of small animal orthopaedic surgery and has been a recognised specialist since 2007. He works as a consultant faculty orthopaedic surgeon at Dick White Referrals, as a consultant with Veterinary Instrumentation and as Honorary Associate Professor at the University of Nottingham School of Veterinary Medicine and Science. He is currently Senior Vice Chairman of the British Veterinary Orthopaedic Association.

Jackie Demetriou
BVetMed CertSAS DipECVS MRCVS
RCVS recognised specialist in small animal surgery (soft tissue)
EBVS® European specialist in small animal surgery

Jackie has been working as a specialist soft tissue surgeon since 2002, both in academia and for the past six years as Head of Soft Tissue Surgery at Dick White Referrals. She has delivered CPD nationally and internationally throughout her career to veterinary students, interns, residents and general practitioners and has held significant roles with the European College of Veterinary Surgeons, both as exam committee member and currently as a board member.

Rob White
BSc BVetMed CertVA DSAS (Soft Tissue) DipECVS SFHEA FRCVS
RCVS recognised specialist in small animal surgery (soft tissue)
EBVS® European specialist in small animal surgery

Rob is well-recognised as one of the UK’s leading experts in soft tissue surgery and has extensive experience in all aspects of small animal surgery. He has been involved in the design and delivery of veterinary CPD for the majority of his career and in 2002, was awarded the BSAVA Simon Award for outstanding contributions to both veterinary surgery and CPD. He was appointed as Professor of Small Animal Veterinary Surgery within the School of Veterinary Medicine and Science in July 2015.
Two-Day Residential Course

that are effective and safe.

will be taught to perform these skills in ways

within a controlled learning environment. You

of essential basic surgical skills and techniques

two highly practical days, you will learn a range

recently been endorsed by the RCSEng. Over

Intercollegiate course offered and accredited

training. Our course is inspired by the BSS

undertaking advanced veterinary surgical

and surgeons contemplating or currently

cornerstone course for all surgical trainees

We believe that our Veterinary Basic Surgical

Skills (VBSS) Course should be considered the

course for all surgical trainees and surgeons contemplating or currently undertaking advanced veterinary surgical training. Our course is inspired by the BSS Intercollegiate course offered and accredited by the four Royal Surgical Colleges (RCPSG, RCSæd, RCSeng, RCSi) of the UK and has recently been endorsed by the RCSeng. Over two highly practical days, you will learn a range of essential basic surgical skills and techniques within a controlled learning environment. You will be taught to perform these skills in ways that are effective and safe.

You will participate in a variety of practical training sessions during the VBSS course, including:

- Safe handling of surgical instruments
- Laying and tying of safe surgical knots
- Tissue handling practice; skin, bowel and bone
- Safe ligation of a vascular pedicle (for example ovarian pedicle)
- Orthopaedic instrumentation including depth gauges, drill guides, power tools etc.
- Orthopaedic implants including plates and screws, K-wires and orthopaedic wire
- Principles of internal fixation including use of screws (for example lag, positional and plate) and the use of plates (for example compression, neutralisation and buttress)

This course is suitable for all veterinary surgeons anticipating a career in surgery and those contemplating or currently undertaking advanced veterinary surgical training. This includes individuals at the start of their surgical careers and those undertaking one of the currently available certificate level surgical qualifications.

Included in the course fee is one night’s accommodation, breakfast and a three course evening meal. All refreshments and lunches are included as is car parking, course notes and free Wi-Fi.

Intermediate Wound Closure and Reconstructive Surgery

Tuesday 18 June

Venue: School of Veterinary Medicine and Science, Loughborough LE12 5RD

CPD hours: 8

Fee: £805 *

Speakers:

Jackie Demetriou BVetMed CertSAS DipECVS MRCSV

Rob White BSc (Hons) BVetMed CertVA DSAS (Soft Tissue) DipECVS SFHEA FRCVS

This unique and comprehensive Veterinary Surgical Training Academy’s intermediate level course covers the basic and intermediate concepts and techniques of wound closure and reconstructive surgery in small animals. It is a practical hands-on intensive one-day workshop covering the full range of commonly performed wound closure techniques. During the workshop each technique will be explained and demonstrated before each delegate is able to carry out the procedure themselves under close supervision. You can expect to carry out all fundamental surgical wound closure techniques during the day with emphasis on how each procedure can be performed in a reliable and safe manner.

*This course is priced at £705 for those who have attended the Veterinary Basic Surgical Skills Course

Intermediate Gastrointestinal Tract Surgery

Tuesday 9 July

Venue: School of Veterinary Medicine and Science, Loughborough LE12 5RD

CPD hours: 8

Fee: £655 *

Speaker: Rob White BSc (Hons) BVetMed CertVA DSAS (Soft Tissue) DipECVS SFHEA FRCVS

This unique and comprehensive Veterinary Surgical Training Academy’s intermediate level course covers the basic and intermediate techniques of suturing, instrument handling and stapling when used to perform gastrointestinal tract surgery in small animals. It is a practical hands-on intensive one-day workshop covering the full range of commonly performed gastric and small and large bowel procedures. These are fundamental techniques that all general small animal surgeons should know and be proficient to perform confidently and safely. During the workshop the techniques will be explained and demonstrated before each delegate is able to carry out the procedure themselves under close supervision. You can expect to carry out numerous fundamental surgical procedures during the day with emphasis on how each procedure can be performed in a reliable and safe manner.

*This course is priced at £675 for those who have attended the Veterinary Basic Surgical Skills Course
Intermediate Urinary Tract Surgery

Wednesday 10 July

Venue: School of Veterinary Medicine and Science, Loughborough LE12 5RD

CPD hours: 8

Fee: £655 *

Speaker: Rob White BSc (Hons) BVetMed CertVA DSAS (Soft Tissue) DipECVS SFHEA FRCVS

This unique and comprehensive Veterinary Surgical Training Academy’s intermediate level course covers the basic and intermediate techniques of suturing and instrument handling when used to perform urinary tract surgery in small animals. It is a practical hands-on intensive one-day workshop covering the full range of commonly performed urinary tract procedures. These are fundamental techniques that all general small animal surgeons should know and be proficient to perform confidently and safely. During the workshop the techniques will be explained and demonstrated before each delegate is able to carry out the procedure themselves under close supervision. You can expect to carry out numerous fundamental surgical procedures during the day with emphasis on how each procedure can be performed in a reliable and safe manner.

*S This course is priced at £575 for those who have attended the Veterinary Basic Surgical Skills Course

Surgical Energy Devices in Clinical Practice

Wednesday 4 December

Venue: School of Veterinary Medicine and Science, Loughborough LE12 5RD

CPD hours: 6

Fee: £455 *

Speakers: Sarah Evans BSc, James Towler Rob White BSc (Hons) BVetMed CertVA DSAS (Soft Tissue) DipECVS SFHEA FRCVS

This course is suitable for qualified veterinary surgeons at any level of training especially those with an active interest in surgery. The course would also be very applicable to veterinary surgeons undertaking a certificate in veterinary surgery. The course will be limited to a maximum of 12 delegates to ensure an unsurpassed learning experience. Ideally (but not essential), delegates will have already attended the VSTA’s Veterinary Basic Surgical Skills Course.

*This course is priced at £400 for those who have attended the Veterinary Basic Surgical Skills Course
Intermediate Arthrodesis  
Tuesday 10 and Wednesday 11 September  
Venue: School of Veterinary Medicine and Science, Loughborough LE12 5RD  
CPD hours: 16  
Fee: £1,600*  
Speaker: Gareth Arthurs PGCertMedEd MA VetMB CertVR CertSAS DSAS (Orth) FHEA FRCVS  
This highly practical two-day arthrodesis intermediate course covers the principles of arthrodesis, its indications and safe application. Delegates will be given the opportunity to perform arthrodesis of both the carpus and tarsus of the dog.  
The course will utilise post-operative radiographs to carefully critique each delegates’ arthrodesis surgery allowing individuals to learn and minimise surgical inaccuracies in the future. The course is aimed at surgeons with previous orthopaedic experience.  
Topics to be covered:  
- Principles of arthrodesis  
- Case selection  
- Pre-operative templating  
- Pancarpal, partial tarsal and pantarsal arthrodesis including tricks and tips to make the surgery safe and repeatable  
- Post-operative radiographs; assessment and critique  
- Awareness and management of post-operative complications  
Delegates should have good experience of orthopaedic surgery including (but not limited to)  
- Dealing with orthopaedic trauma cases  
- Internal fixation of fractures  
- Locking and non-locking plates  
- Performing osteotomies  
- Managing cases that would benefit from arthrodesis  
*This course is priced at £1,400 for those who have attended the Veterinary Basic Surgical Skills Course

Kindly sponsored by Veterinary Instrumentation and PLH Medical Ltd

Intermediate Feline Orthopaedic Surgery  
Tuesday 10 and Wednesday 11 December  
Venue: School of Veterinary Medicine and Science, Loughborough LE12 5RD  
CPD hours: 16  
Fee: £1,600*  
Speaker: Gareth Arthurs PGCertMedEd MA VetMB CertVR CertSAS DSAS (Orth) FHEA FRCVS  
This highly practical two-day feline orthopaedic course is dedicated to understanding the fundamentals of feline orthopaedic surgery and how this differs from orthopaedic surgery in the dog.  
The first day will focus on common surgical conditions of the hip and stifle joints.  
The second day will focus on feline fracture repair including each long bone (femur, tibia, humerus and radius/ulna).  
This course is aimed at surgeons with basic orthopaedic experience who wish to enhance their skills in feline orthopaedic surgical techniques.  
Topics to be covered:  
- Surgical conditions of the feline hip including fractures and luxation  
- Surgical conditions of the feline stifle including patellar luxation, cruciate instability and distal femoral fractures  
- Diaphyseal and physeal fractures of the femur, tibia, radius, ulna and humerus  
Delegates should have good experience of basic orthopaedic surgery and the management of orthopaedic cases including  
- Fractures  
- Hip luxation and patellar luxation  
- Internal fixation techniques including plates, screws, K-wire and tension band placement  
*This course is priced at £1,400 for those who have attended the Veterinary Basic Surgical Skills Course

Kindly sponsored by Veterinary Instrumentation
Masterclass in Tibial Plateau Levelling Osteotomy (TPLO)

Wednesday 22 and Thursday 23 May
Venue: School of Veterinary Medicine and Science, Loughborough LE12 5RD
CPD hours: 16
Fee: £2,495
Speaker: Gareth Arthurs PGCertMedEd MA VetMB CertVR CertSAS DSAS (Orth) FHEA FRCVS

This highly practical two-day Masterclass will be dedicated to understanding and performing TPLO surgery.

Day 1: The first day will cover theoretical principles and practice of TPLO including plastic bone exercises and bone templating.

Day 2: The second day will be dedicated entirely to cadaveric surgical exercises of TPLO. The course will utilise post-operative radiographs to carefully critique each delegates’ TPLO surgery, allowing individuals to learn from each other’s performance.

Topics covered:
- History and evolution of the TPLO technique
- Case selection
- Pre-operative templating
- The TPLO surgical procedure including tips and tricks to make the operation as safe and repeatable as possible
- Post-operative radiographs; assessment and critique
- Managing issues with plating and tips to make the surgery safe and repeatable

The course will be limited to a maximum of ten delegates.

Kindly sponsored by Veterinary Instrumentation and PLH Medical Ltd

Masterclass in Cranial Closing Wedge Tibial Plateau Levelling Osteotomy (CWO-TPLO)

Tuesday 17 September
Venue: School of Veterinary Medicine and Science, Loughborough LE12 5RD
CPD hours: 8
Fee: £1,200
Speaker: Gareth Arthurs PGCertMedEd MA VetMB CertVR CertSAS DSAS (Orth) FHEA FRCVS

This highly practical one-day Masterclass is dedicated to understanding and performing CWO-TPLO surgery. Delegates will be taught the surgical theory prior to undertaking plastic bone exercises and performing the procedure on cadaveric material.

The course will utilise post-operative radiographs of each delegate’s surgery. These radiographs will be critiqued so that delegates can learn from any errors thereby minimising surgical inaccuracies in the future. This course is aimed at experienced orthopaedic surgeons who wish to learn the CWO-TPLO technique.

Topics covered:
- History and evolution of the CWO-TPLO technique
- Case selection
- Pre-operative templating
- The CWO-TPLO surgical procedure including tricks and tips to make the operation as safe and repeatable as possible
- Post-operative radiographs; assessment and critique
- Managing post-operative complications

The course will be limited to a maximum of ten delegates.

Applied Musculoskeletal Anatomy of the Dog

Thursday 8 August

Venue: School of Veterinary Medicine and Science, Loughborough LE12 5RD
CPD hours: 8
Fee: £195

Speakers: Dr Richard Payne MA VetMB DProf AdvCertVPhys CertClinEd HonFIRVAP FRSA PAMPIPEM MRCVS
Erica Gummery

This practical one-day hands-on course will focus on linking anatomy with clinical conditions in sporting/working dogs, but with relevance to non-sporting/working dogs. The course is very practical including various interactive tasks to explain anatomical biomechanics. Delegates will also be able to view and handle museum specimens and dissections of key areas of the musculoskeletal system in order to strengthen their understanding of its function and disease.

This course is designed for veterinary surgeons/nurses and allied health care and therapy professionals.

Applied Musculoskeletal Anatomy of Greyhounds

Wednesday 14 August

Venue: School of Veterinary Medicine and Science, Loughborough LE12 5RD
CPD hours: 8
Fee: £195

Speakers: Dr Richard Payne MA VetMB DProf AdvCertVPhys CertClinEd HonFIRVAP FRSA PAMPIPEM MRCVS
Erica Gummery

This one-day course will provide practitioners who are in contact with racing greyhounds the opportunity to discuss injury patterns and anatomical features in this breed. Access to anatomical prosections and live greyhounds will allow the delegates to develop consistent and robust examinations techniques of the musculoskeletal system in the breed.

This course is designed for veterinary surgeons/nurses and allied health care and therapy professionals.

25% discount
Take advantage of a 25% discount if you book before 28 February 2019
Husbandry, Medicine and Surgery of the Pet Rabbit

Wednesday 16 October

Venue: School of Veterinary Medicine and Science, Loughborough LE12 5RD
CPD hours: 8
Fee: £355
Speaker: Craig Hunt BVetMed DZooMed CertSAM RCVS MRCVS

This one-day lecture-based course will cover a broad range of aspects relating to rabbit ailments and clinical techniques commonly encountered in general practice. There will be opportunity to discuss real cases and delegates are welcome to bring case material to be discussed on the day.

Practical Rabbit Dentistry

Wednesday 30 October

Venue: School of Veterinary Medicine and Science, Loughborough LE12 5RD
CPD hours: 8
Fee: £655
Speaker: Craig Hunt BVetMed DZooMed CertSAM RCVS MRCVS

This practical course will focus on all aspects of rabbit dentistry to give the delegate a thorough understanding of the pathophysiology and management of rabbit dental disease. A combination of Powerpoint presentation and extensive cadaver practical sessions will guide the delegate from first presentation through diagnosis and treatment of the rabbit patient. Controversies in management will be discussed.

Take advantage of a 25% discount if you book before 28 February 2019
Introduction to Small Animal Ultrasound

Wednesday 3 April, Wednesday 3 July, Wednesday 6 November

Venue: School of Veterinary Medicine and Science, Loughborough LE12 5RD

CPD hours: 8

Fee: £655

Speaker: Gary England BVetMed PhD DVetMed CertVA DVR DipECAR DipACT PFHEA FRCVS

This highly interactive and practical one-day course will focus on how to get the most out of ultrasound machines, and how to image the major abdominal organs and the heart. Presentations on each body system will consider imaging techniques, normal findings and a brief overview of common pathological changes. These are followed by practical scanning sessions supported by experienced tutors. Delegates will have the chance to use a range of ultrasound machines and get plenty of opportunity to practice their technique on live dogs.

Practical Small Animal Echocardiography – an Introduction

Wednesday 17 April, Wednesday 23 October

Venue: School of Veterinary Medicine and Science, Loughborough LE12 5RD

CPD hours: 8

Fee: £655

Speaker: Malcolm Cobb MA VetMB DVC PhD MBA FHEA MRCVS

This practical one-day course will focus on the generation and interpretation of basic cardiac ultrasound images in the dog. The course will provide an overview of the equipment and facilities needed and cover the techniques used in the generation and interpretation of right parasternal, long and short axis echocardiographic images. The delegates will enjoy the opportunity to carry out echocardiography in the School of Veterinary Medicine and Science’s teaching laboratory with a significant proportion of the time dedicated to practical echocardiography.

Kindly sponsored by IMV Imaging

Take advantage of a 25% discount if you book before 28 February 2019
Ultrasound – Intermediate Level

Intermediate Small Animal Abdominal Ultrasound

Tuesday 3 and Wednesday 4 September (two days)
Venue: School of Veterinary Medicine and Science, Loughborough LE12 5RD
CPD Hours: 16
Fee: £1,350
Speakers: Richard Ewers BSc BVSc CertVR PGCHE DMS MRCVS
Andrew Parry MA VetMB CertVDI DipECVDI MRCVS

This highly interactive and practical two-day course will focus on how to get the most out of an abdominal ultrasound examination (including small abdominal structures). Presentations on each body system will consider imaging techniques, normal findings and common pathological changes. These are followed by practical scanning sessions supported by experienced tutors. Delegates will have the chance to use a range of ultrasound machines and get plenty of opportunity to practice their technique on a live dogs.

The course will include:
- Review of ultrasound machine settings to optimise image
- Obtaining diagnostic images of abdominal structures (liver, spleen, stomach, small intestine, large intestine, kidneys, bladder, pancreas, adrenals, lymph nodes)
- Appreciating the appearance of common pathological changes in abdominal structures with ultrasonography
- Principles of ultrasound-guided sampling (including practice with simulators)

Introduction to CT and MRI

Wednesday 13 November
Venue: School of Veterinary Medicine and Science, Loughborough LE12 5RD
CPD Hours: 8
Fee: £355
Speakers: Andrew Parry MA VetMB CertVDI DipECVDI MRCVS

There is an increasing availability of CT and MRI in general practice and consequently a larger requirement for general practitioners to understand the usefulness of such modalities. This course is designed to give a better understanding of the advantages, and importantly, the limitations of CT and MRI for use in general practice. It will include a discussion of which cases would benefit more from a CT examination and which would benefit more from MRI.

Topics to be covered:
- Introduction and growth of CT and MRI in the human and veterinary field
- CT and MRI physics
- How to run a scanner
- Use of contrast in CT and MRI
- How to avoid CT and MRI artefacts
- Appropriate use of CT and limitations
- Appropriate use of MRI and limitations
- Case selection for CT and MRI

This course is designed for general practitioners and advanced practitioners in general practice who would like to know more about the use of CT and MRI. Candidates for the course should be interested in diagnostic imaging, and where advanced imaging may be useful for general practice patients.

Kindly sponsored by IMV Imaging

Imaging
Poultry Health (online or residential)

Online: October – May each year. Residential: 23rd April – 3rd May 2019

Residential:
Week one: Pirbright Institute, Surrey
Week two: University of Nottingham Sutton Bonington Campus, Loughborough

Residential course participants will need to make their own way between the two venues.

Fee:
Online course – £800 without exam, £900 with exam
Residential course – £1,900 without exam, £2,000 with exam

The course exam will be held at Sutton Bonington campus on June 24th 2019. Overseas delegates can take the exam in their own country but need to enquire at the AFTP office for arrangements and related fees.

Speakers:
Over 30 UK and international speakers from industry and academia, including Professor Paul Barrow of the University of Nottingham Veterinary School. Full details of the speakers are found on the website poultryhealthcourse.com

Poultry rearing for meat and eggs is now a global activity. Infectious agents and other causes of disease continue to change and adapt. It is important for poultry professional to keep abreast of the latest applied and pure scientific developments which can affect the industry.

The Poultry Health Course is updated annually and has been running since the 1970’s and includes 55 lectures delivered by 30 international experts in their fields of pathology, poultry rearing, nutrition, pathology, parasitology, virology and bacteriology coupled with applied subjects such as vaccination, post-mortem examination and laboratory diagnosis.

The online course is run from October to May with each lecture consisting of a video introduction by the expert presenter with the same Powerpoint slide presentation also presented as an audio commentary by the lecturer and an interactive tutorial which enables the student to test their knowledge.

This course is for veterinary surgeons, technical staff and managers from the poultry industry who wish to learn more about the nature, diagnosis and control of infectious diseases of poultry. The course is also suitable for non-specialist graduates who wish to gain a thorough knowledge of the poultry sector while working towards the postgraduate awards in Agrifood.

International delegates need a recognised standard of English capability.

Tricky Medical Cases

Wednesday 15 May

Venue: School of Veterinary Medicine and Science, Loughborough LE12 5RD
CPD hours: 8
Fee: £355

Speakers: Mark Dunning MA Vet MB PhD CertSAM DipECVIM-CA MRCVS
Caroline Kisielewicz MVB CertSAM DipECVIM-CA MRCVS

Using real-life cases, this course will review a wide variety of small animal medical disorders, and teach delegates how to identify salient problems, formulate lists of differential diagnoses and diagnostic plans, interpret the results of diagnostic tests and understand the latest treatment options.

A Surgical Tour of the Abdomen

Tuesday 11 June

Venue: School of Veterinary Medicine and Science, Loughborough LE12 5RD
CPD hours: 8
Fee: £355

Speakers: Rob White BSc (Hons) BVetMed CertVA DSAS (Soft Tissue) DipECVS SFHEA FRCVS

The exploratory coeliotomy is a commonly performed operation in veterinary practice. It should be regarded as an opportunity to examine the entire abdominal cavity, and surgeons should avoid the temptation to treat only the obvious lesion prior to closure of the peritoneal cavity. It is also important to biopsy relevant viscera both in cases with obvious lesions and in those showing no apparent pathology. The lectures will provide an overview of normal surgical abdominal anatomy in both the dog and cat. Video presentations will be used to show techniques than can be used to biopsy all of the major abdominal viscera. Practical tips and tricks for performing a successful exploratory coeliotomy will be stressed. In addition, lectures and video presentations will also cover some common surgical procedures such as gastrotomy, enterotomy and enterectomy. There will be an opportunity to practice some of these techniques in the dry lab setting.

25% discount

Take advantage of a 25% discount if you book before 28 February 2019
Small Animal Dermatology – New Products and Treatments
Wednesday 26 June
Venue: School of Veterinary Medicine and Science, Loughborough LE12 5RD
CPD hours: 8
Fee: £355
Speakers: Kate Griffiths BVSc CertVD PGDip (MedED) MRCVS
Stephen Shaw BVetMed CertSAD DVD PhD MRCVS
The course aims to bring delegates up-to-date with the new therapeutic options available for managing a range of common skin and ear conditions. The number of new products and drugs used in dermatology has increased markedly in the last few years, and their potential for individual and combined use makes deciding between these, and the safe replacement of older products, difficult. We will therefore discuss how to get the best from the newer products and also discuss updated treatment protocols for more established products.

All You Ever Wanted to Know about Immune-Mediated Diseases – it’s not just Steroids!
Thursday 27 June
Venue: School of Veterinary Medicine and Science, Loughborough LE12 5RD
CPD hours: 8
Fee: £355
Speaker: Mark Dunning MA VetMB PhD CertSAM DipECVIM-CA MRCVS
This ever-popular interactive one-day face-to-face course will discuss the clinical signs and management of immune-mediated diseases in small animals. Using real-life clinical cases the course will review some of the more commonly identified immune-mediated diseases in both dogs and cats.

A Practical Guide to Sarcomas and Carcinomas in Dogs
Tuesday 2 July
Venue: School of Veterinary Medicine and Science, Loughborough LE12 5RD
CPD hours: 8
Fee: £355
Speaker: Chiara Penzo DVM Dip ECVIM-CA (Oncology) MRCVS
This course is a practical guide for the general practitioner to the correct diagnosis and management of the most frequently diagnosed sarcomas and carcinomas in dogs. The participants will learn through interactive discussion of clinical cases how prognosis for patients affected by these malignant cancers is affected by clinical stage, and how promptly appropriate therapy is instituted, and what therapy is chosen. Multiple treatment options will be discussed for each neoplastic condition, with emphasis on clinical stage, cost of treatment, prognosis and palliative care.

Essentials of Practical Parasitology
Tuesday 20 August
Venue: School of Veterinary Medicine and Science, Loughborough LE12 5RD
CPD hours: 8
Fee: £355
Speakers: Hany Elsheikha BVSc MSc PhD FRSPH PGCHE FHEA DipEVPC
Ian Wright BVMS MSc MRCVS
This practical one-day hands-on course will focus on the latest approaches for the creation of an effective practice parasite control policy. The course will discuss the key and contentious issues relating to the creation and implementation of such a parasiticide policy. Emphasis will be placed on the role and importance that each member of the practice team has for the successful implementation of this policy. A concise and simple algorithm to help gather critical information from clients will be provided. The course will include numerous opportunities for hands-on wet lab practical exercises including quantitative faecal egg counts, nematode larval isolation and ectoparasite identification.

More Tricky Medical Cases
Wednesday 2 October
Venue: School of Veterinary Medicine and Science, Loughborough LE12 5RD
CPD hours: 8
Fee: £355
Speaker: Mark Dunning MA VetMB PhD CertSAM DipECVIM-CA MRCVS
This course looks to build on the initial tricky medicine cases course and will use the same interactive case-based format. We will review a wide variety of small animal medical disorders, and continue to work on identification of and organisation of clinical problems along with formulation and prioritization of differential diagnosis lists, focusing on diagnostic plans. It will help delegates interpret the results of diagnostic tests and understand the latest treatment options. We will encourage group participation in the decision making process throughout the case discussion sessions.

Seizures in First Opinion Practice
Tuesday 8 October
Venue: Dovecote Veterinary Hospital, Castle Donington DE74 2LJ
CPD hours: 8
Fee: £355
Speakers: Mark Lowrie MA VetMB MVM DipECVN MRCVS
Mike Targett MA VetMB PhD DECVN MRCVS
This one-day face-to-face course will provide a comprehensive review of seizures in small animals. The pathophysiology of seizure activity will be explored and compared with other similar episodic collapse syndromes in small animals. The appropriate use of anticonvulsant medications, both on and off cascade, will be discussed and their use in the attempted control of both simple and pharmacoresistant idiopathic epileptic patients will be described. The day will cover all you ever need to know about the investigation and management of seizures in the dog and cat.

A Practical Approach to the Management of Endocrine Disease in Small Animals
Wednesday 9 October
Venue: School of Veterinary Medicine and Science, Loughborough LE12 5RD
CPD hours: 8
Fee: £355
Speaker: Rob Foale BSc BVetMed DSAM DipECVIM-CA MRCVS
This one-day course will cover the clinical approach and treatment of all the common, and some of the less common, endocrinopathies that are recognised in small animals. Emphasis will be placed on accurate diagnosis, successful treatment and safe monitoring of patients suffering from and endocrine disorder. Knowing whether or not an endocrine disorder is responsible for an animal's clinical signs is not always as straightforward as recognising PUPD, or bilateral symmetrical alopecia. The signs of an endocrine disease or the signs of an animal under treatment becoming unstable can often be completely overlooked until a crisis point is reached. This course will provide information to prevent such situations arising.

Basic Medical and Surgical Oncology
Thursday 10 October
Venue: Twycross Zoo, Atherstone CV9 3PX
CPD hours: 8
Fee: £355
Speakers: Rob Foale BSc BVetMed DSAM DipECVIM-CA MRCVS
Jackie Demetriou BVetMed CertSAS DipECVS MRCVS
This one-day face-to-face course is aimed at general practitioners who have an interest in surgical and medical oncology. The course will provide relevant and practical information on the clinical management of small animal oncology cases seen in general practice. The course will cover basic principles including the best way of obtaining a diagnosis and oncological staging, through to treatment options for commonly identified cancers in the dog and cat. The aim of the course will be to enhance clinical skills and knowledge and improve delegate’s confidence when dealing with what can be both mentally and emotionally challenging cases.

**Course includes FREE on the day zoo entry**

Take advantage of a 25% discount if you book before 28 February 2019
A Practical Guide to Canine Lymphomas and Mast Cell Tumours

Thursday 24 October
Venue: Twycross Zoo, Atherstone CV9 3PX
CPD hours: 8
Fee: £355
Speaker: Chiara Penzo DVM Dip ECVIM-CA (Oncology) MRCVS

This course is a practical guide for the general practitioner to the correct diagnosis and management of two very frequently diagnosed cancers. The diagnosis of lymphoma and mast cell tumours are also a frequent reason why specialist advice or referral is sought.

The course delegates will receive a practical overview of the diagnostic tests and clinical staging for both cancers. Indications for multimodal therapy and details of chemotherapy protocols will be provided and discussed. The day will include interactive discussion of clinical cases to enhance the learning experience.

**Course includes FREE on the day zoo entry**

Bleeding Small Animals!

Thursday 7 November
Venue: Twycross Zoo, Atherstone CV9 3PX
CPD hours: 8
Fee: £355
Speakers: Mark Dunning MA VetMB PhD CertSAM DipECVIM-CA MRCVS
Caroline Kisielewicz MVB CertSAM DipECVIM-CA MRCVS

Dogs and cats presenting with bleeding disorders can be daunting and it is vital to have a logical approach to their diagnosis and management. This one-day face-to-face course will use a wide selection of case-based examples to discuss and illustrate the management of common presentations seen in primary care practice.

**Course includes FREE on the day zoo entry**

Neurology in Small Animals – How to Cope when the Owners Can’t Afford Referral

Tuesday 12 November
Venue: Dovecote Veterinary Hospital, Castle Donington DE74 2LJ
CPD hours: 8
Fee: £355
Speakers: Mark Lowrie MA VetMB MVM DipECVN MRCVS
Mike Targett MA VetMB PhD DECVN MRCVS

Neurological cases in first opinion practice can appear quite intimidating, especially when referral is not an option for practical reasons. This course will consider small animal neurological patients from the standpoint of a first opinion clinician. An understanding of basic neuroanatomy will be used to explain what can be achieved in general practice in terms of presumptive and definitive diagnoses for the more common presentations. The course will then progress to discuss the rational approach to treatment in cases where advanced imaging such as MRI is not available.

Wound Reconstruction – from Simple Skin Tension Management to More Advanced Flap Techniques

Wednesday 20 November
Venue: School of Veterinary Medicine and Science, Loughborough LE12 5RD
CPD hours: 8
Fee: £355
Speaker: Jackie Demetriou BVetMed CertSAS DipECVS MRCVS

Wound tension and the need for reconstruction is a problem that is faced daily in veterinary practice. This course will discuss the principles of wound tension and its management. Using a combination of these surgical principles, delegates will be taught ways to close wounds under both moderate and severe tension. The lectures will be informative yet based on actual clinical cases with step-by-step photos on how to perform each surgery.

**Course includes FREE on the day zoo entry**
Small animal

**Challenging GI Cases – a Problem Solving Approach**

**Wednesday 27 November**

**Venue:** School of Veterinary Medicine and Science, Loughborough LE12 5RD

**CPD hours:** 8

**Fee:** £355

**Speaker:** Rob Foale BSc BVetMed DSAM DipECVIM-CA MRCVS

This course will provide delegates with a practical case-based approach to those more difficult cases of acute and chronic gastrointestinal disease. A systematical protocol for diagnostic work-up will be demonstrated, and will include how to use the nuances of history and clinical signs to help guide you, as well as what diagnostic tests are appropriate and when to use them.

**Take advantage of a 25% discount if you book before 28 February 2019**

---

**Polyuria and Polydipsia – it’s not all Kidneys and Cushing’s You Know!**

**Thursday 28 November**

**Venue:** Twycross Zoo, Atherstone CV9 3PX

**CPD hours:** 8

**Fee:** £355

**Speakers:** Mark Dunning MA VetMB PhD CertSAM DipECVIM-CA MRCVS

Caroline Kisielewicz MVB CertSAM DipECVIM-CA MRCVS

This course will review the various causes of PU/PD that are not classic cases of chronic kidney disease or Cushing’s disease. We will discuss, using an interactive case-based format, how these cases can be approached. We will also review how to manage some of the less common causes of PU/PD that both trouble and frustrate clinicians and owners alike.

The course will use anonymous voting software that will enable delegates to make the most of the presented material, and will provide ample opportunities to ask questions throughout the day.

**Course includes FREE on the day zoo entry**

---

**A Practical Guide to Cat Cancers**

**Thursday 5 December**

**Venue:** Twycross Zoo, Atherstone CV9 3PX

**CPD hours:** 8

**Fee:** £355

**Speaker:** Chiara Penzo DVM PhD DipECVIM-CA(Oncology) MRCVS

This course, for the general practitioner, is a practical guide to the correct diagnosis and management of the most frequent cancers in cats. The course will be taught using interactive discussion of clinical cases. Subject matter will include the role of the clinical stage in a patient’s prognosis, the general and specific options for therapy, and the importance of prompt diagnosis and management of affected cases. For each neoplasm and clinical stage, multiple treatment options will be discussed, including both palliative options and those to suit the expectations and budget of the client.

**Course includes FREE on the day zoo entry**

MSc/PGDip Veterinary Physiotherapy

Study the theory and practice of veterinary physiotherapy, leading to a professional qualification.

Overview:
An interactive weekend based course, starting from early September. It is run over two years part-time (PGDip) with additional research project year (MSc).

Content:
Includes theoretical and practical based sessions. Work-based learning days, clinics and placements provide experience with various qualified physiotherapists from all over the country. Learn hands-on techniques alongside using electrotherapy in practice.

The modules covered include:
- Foundations of professional practice
- Anatomy and physiology
- Investigating pathophysiology
- Foundations of clinical practice
- Applied clinical skills
- Project proposal and development
- Clinical reasoning and reporting

Entry Requirements:
Degree at or above 2:2, or international equivalent, in a relevant subject. Prior experience may be considered for mature applicants. Requires knowledge of animal care/handling through a minimum work experience requirement of 3 weeks with horses and 3 weeks with dogs, along with a minimum of 6 days at a veterinary practice.
IELTS – 7.5 (no less than 7.0 in any subject.)
Suitable for musculo-skeletal practitioners, veterinarians, veterinary nurses or those with an interest in rehabilitation.

Assessments:
A spiral curriculum is employed to ensure competency is achieved and assessed throughout the course by summative and formative work. Assessments are via written work, portfolios of progression and by completing clinic days and placements in addition to the weekend teaching. For the PGDip, you’ll need to complete 120 credits of taught modules over two years. For the MSc, you’ll need to complete the PGDip then study a third year research project taking you to 180 credits.

Facilities:
- Based at Nottingham Veterinary School, Sutton Bonington Campus
- Weekend contact days alongside external placements and clinics
- Small group practical sessions
- Dissections
- Anatomical specimens
- Stables and kennels
- Experienced external lecturers
- Clinical skills teaching room
- Supporting notes

The course is a brilliant mix of practical, hands-on skills with animals and high levels of academic challenge. With expert tutors and amazing resources at the vet school, it’s a great place to learn.

Alison Nichols,
MSc Veterinary Physiotherapy Student
