Dear Colleagues,

The University of Nottingham Veterinary Pathology Service will follow the governmental and university guidelines and we will be closed to non-emergency cases until further notice.

If you have a non-emergency case that requires a post mortem examination during these times please freeze the body, ready to be submitted to us, once we have reopened. Please be aware that the freezing of the cadaver may affect the post mortem findings so you may wish to consider other options for diagnosis. Any biopsy material should be fixed in 10% formalin. When we receive the recommendation to re-open we will let you all know and make arrangements for the cadavers you have on hold to be sent on to us.

Unfortunately cases that have been submitted in the last 3 weeks the reports will take longer than the original 4-6 week turnaround.

We have also attached this message as a word document if you wish to print it for further distribution of this information.

In case of an emergency, please call us on 07813537686 which will be operational between the hours of 10am - 3pm Monday to Friday.

Thank you for submitting cases to the University of Nottingham and your continued support.

Can we take this opportunity to offer you all our very best wishes for your physical and mental health as we continue to navigate through the difficult times ahead.
