Consultancy services

Access academic expertise through
Nottingham University Consultants

nottingham.ac.uk/go/consultancy

Engage an academic consultant

Access world-class
knowledge, research
and facilities

Academics at the University work as consultants for organisations in the public and private sectors all over the world. They provide expertise, skills and, where appropriate, access to facilities and equipment.

Solutions to a broad range of challenges

There are many ways our academic consultants can work with your organisation, from acting as an expert witness, to carrying out feasibility studies on R&D projects.

Other examples of consultancy types include:

- Technical and creative expertise and solutions to industrial problems
- Literature review
- Providing expert analysis, interpretation and reports
- Briefing on technical or policy development
- Serving on professional and government committees and advisory boards
- Consulting on collaborative and contract research projects
- Test and analysis work combined with expert interpretation
